9.9.2	Summary	220

2 INTRODUCTION

This module is being developed in order to provide and make MR capable to create Credit note (CN) or ZHO request. Credit note or ZHO requests gets created for potential Doctors who can support to increase Mankind product sales in the market. MR creates CN and ZHO note requests, to provide extra schemes or discount in the form of %age to specific Doctor or Chemist over the ongoing discounts/schemes on MRP (maximum retail price) for specific product. This module requires to cover whole process which team is currently liable to do, like MR creating CN or ZHO requests for specific Doctor or mapped Chemist(s), approval process of Managers, FC and CN team. This component will also be required an integration with **SAP HANA** system to fetch and send some required data. A dashboard will be created for each user to show raised CN and ZHO requests separately, Create new request option for CN and ZHO by MR and FLM, Summary from Doctor, Stockist and Product wise along with segregated values of CN and ZHO requests values against total order value. User can also be able to view average last three months support and potential values under summary. Order history of CN and ZHO request also be required to show separately to user.

- **MR (Medical Representative)**
 - **View CN and ZHO Requests separately** – Need a provision for MR to View raised CN and ZHO requests for Doctor/Stockist/Chemist along with its status. User will also have an option to view summary of CN and ZHO requests and approved/rejected CN and ZHO requests on order history of CN and ZHO if scheme is generated in SAP and supplied bills has been approved by CN team along with Summary on the basis of logged in MR.

- **Create CN or ZHO Requests** – Need to provide provision to create new CN and ZHO requests by submitting Doctor and Product details. In case of CN only while creating the request, a disclaimer pop-up will be shown with the summary of Credit Note orders and amount raised for this month. After creating the request, it would be sent for an approval as per Mankind hierarchy to Managers and FC team (FLM→SLM→TLM→FC→PMT (if required)). At the time of FC approval, need to check allowed %age discount of product. If CN or ZHO request %age is higher then allowed %age discount, PMT approval will be required otherwise, request will be completed after FC approval. User will be also be able to enter remarks and save request for later just before submitting the request. Remarks will be shown to Manager(s) and save for later will allow user to save the application as draft which can be modified later on or send for approval.
- **Submit Claims** – After acquiring approvals from all the managers, user would be allowed to submit claims against each CN and ZHO and product. To submit the claims, application will be required to integrate with **SAP HANA** system to fetch the invoice details. Invoices will be further allocated to each product considering the same product was supplied against the specified invoice. User will also require provision to enter some details manually like supply quantity, Bonus amount, Bill No. and bill date. These claims will be sent to managers and CN team for approval.
- **Upload Bill Copy** – After selecting the invoice(s), user will have provision to upload bill(s) copy in PDF, JPG and PNG formats only against each bill number which was provided by Stockist.
- **Notification** – User will be notified on each level of approval/rejection from both the cases like CN/ZHO requests and Claim submissions.
- **View Summary** – User will have an option to view summary of CN and ZHO requests on which Credit note or ZHO number has been generated by SAP. User will also have an option for filters of time period (from/to date selection). User will be able to view CN and ZHO requests segregated on the basis of total orders and sales values which can be further segregated Doctor, Stockist and Product wise.
- **Order History** – User will have provision to review order history, once CN number for CN request and scheme/ZHO number for ZHO requests will be generated in SAP. User will also have an option to filter the data with time period (from/to date selection) and search via claim no.

Note: All raised requests should be division specific which means MR can raise request for allocated division only which will be sent for approval to same division manager(s).

- **Managers (FLM, SLM, TLM and PMT)**

- **View Approval Requests** – FLM, SLM, TLM and PMT managers (The user) in Superman app or separate online web version for 'Credit Note/ZHO', will get an option to view all/open requests of CN and ZHO separately for approval to respective manager raised by MR or FLM.
- **Filters – Search via Claim no. and Filter on the basis of time period, all requests, extra scheme approval requests, claims submission requests and approved.** The user should be able to search claim via claim no. from the search panel. User can also be able to filter the data on the basis of time period (from/to date selection), all requests, extra scheme approval requests, claims submission requests and approved wise.
- **Create CN or ZHO requests (only for FLM)** – Need to provide provision to create new CN and ZHO requests (on behalf of MR) by submitting Doctor and Product details. In case of CN only while creating request, a disclaimer pop-up will be shown with the summary of Credit Note orders and amount raised for this month. After creating the request, it would be sent for an approval as per Mankind hierarchy Managers and FC team {SLM→TLM→FC→PMT (if required)}. User will also get an option to enter remarks and save request for later, just before submitting the request. Remarks will be shown to Manager(s) and save for later option will allow user to save the application as draft which can be modified or send for approval later on. To create the request by FLM will require an additional option to select MR (on whose behalf he/she is submitting the request). On the basis of MR selection, same request will be visible to respective MR as well on which MR can also be able to perform required actions. Requests raised by FLM, will be shown separately in FLM dashboard.
- **View Summary** – User will have an option to view summary of CN and ZHO requests along with filters of time period (from/to date selection), MR and Stockist. User will be able to view CN and ZHO requests segregated on the basis of total orders and sales values which can be further segregated Doctor, Stockist and Product wise.
- **Download Bills** – User should have provision to download bills uploaded by MR for respective CN/ZHO request, in case of claim submission only. User must have ability to download Doctor's prescription as well uploaded by MR.
- **Approve/Reject open requests** – User should have the provision to Accept/Reject the CN and ZHO request application and submitted claims by MR. Approval request will

follow Mankind hierarchy. Once approved from respective manager, request will be sent to subsequent manager for approval. After approval of each manager, MR will be notified. User will also require provision to write the remarks for acceptance/rejection and which can be viewed by MR and Managers (if applicable). In case of Rejection only, below managers shall also be notified along with MR.

Note: For PMT head approval flow will require to provide a web version separately. It will not be part of Superman app. However, it would be similar to another managers screens/flow.

- **FC (Field Coordinators) Team**

- **View Approval Requests** – The user should have provision to view all/open requests of CN and ZHO separately available for FC team approval. FC team will get the requests from all over India of MR and FLM both users.
- **Approve/Reject open requests** – User should have the provision to Accept/Reject the CN and ZHO request application which must be approved by TLM. Approval request will follow Mankind hierarchy {FLM →SLM→TLM→FC→PMT (if required)}. Once approved from all the managers, request will be sent to FC team for approval. FC team can approve/reject the request only after TLM approval. After acceptance/rejection of FC team, MR will be notified. At the time of FC approval, need to check allowed %age discount of product. If CN or ZHO request %age is higher than allowed %age discount, request will be automatically sent for PMT head approval. Otherwise, request will be completed after FC approval. Before acceptance/rejection, user should have provision to write the remarks, same can be viewed by MR and managers. In case of Rejection only, below managers shall also be notified along with MR.
- **View Summary** – User should have provision to view summary of CN and ZHO requests along with some filters. User should be able to view CN and ZHO requests segregated on the basis of total orders and sales values which can be further segregated Doctor, Stockist and Product wise.

Note: This user flow will not be part of Superman app. For this, will require to provide a web version separately.

- **CN (Credit Note) Team**

- **View Claim Approval Requests** – The user should have provision to view all/open claim requests of CN and ZHO separately for CN team approval after approval of TLM. User should have an option to view filled and submitted information by MR for each request. CN team will get the requests from all over India MR and FLM both users.

- **Approve/Reject open requests** – User should have the provision to Accept/Reject the claim requests submitted by MR or FLM against each CN and ZHO request. After approvals of all the managers and FC team, MR should get an option to submit the claim for each CN and ZHO request. After submission of claims, request should follow Mankind hierarchy {FLM →SLM→TLM→CN team (if required)} for claim approval. Once approved from all the managers, request will be sent to CN team for approval. User should have the option to select multiple claims, to approve/reject them along with remarks. MR will be notified through notification in case of Accept/Reject. Remarks should be shown to MR and managers against the request. In case of Rejection only, below managers shall also be notified along with MR.
- **View Summary** – User should have an option to view summary of CN and ZHO requests along with some filters after approval of requests. User will be able to view CN and ZHO requests segregated on the basis of total orders and sales values which can be further segregated Doctor, Stockist and Product wise.
- **SAP Integration**
 - **Forward Integration** – All details of approved claims will be sent to SAP. Once approved, each claim will get a unique CN (Credit Note) number generated through SAP, and CN number will be assigned to each claim.
 - **Backward Integration** – CN Number against each approved claim will be sent from SAP to Superman.

Note: This user flow will not be part of Superman app. For this, will require to provide a web version separately.

3 SCOPE OF WORK

3.1 DEVELOPMENT OF USER INTERFACE DESIGN

This will ensure professional look and feel for the web application. This will be done by working together with Mankind users in ensuring that all of its expectations related to the overall aesthetics, content presentation structure and content organization structure are achieved. While preparing designs we will also make sure that they are developed as per the relevant guidelines.

3.2 CREATE CREDIT NOTE AND ZHO REQUESTS

There should be a provision for MR and FLM (on behalf of MR) to create new CN and ZHO requests by submitting Doctor and Product details. After creating the request, each request will be sent for approval as per Mankind hierarchy. Once request has been approved from respective manager/team, it will be sent to subsequent manager or team for approval. MR will be notified on each and subsequent acceptance/rejection. In case of Rejection only, below managers shall also be notified along with MR. User will be also be able to enter remarks and save it for later, just before submitting the request. Remarks will be shown to Manager(s) and saved applications will be considered as draft which later can be modified or send for approval.

3.3 APPROVE/REJECT CN/ZHO REQUESTS

There should be a provision for user to Accept/Reject the CN and ZHO requests raised by MR or FLM. After creating the request, each request will be sent for approval as per Mankind hierarchy which is {FLM→SLM→TLM→FC→PMT (if required)}. Once request has been approved from respective manager/team, it will be sent to subsequent manager or team for approval. At the time of FC approval, need to check allowed %age discount of product. If CN or ZHO request %age is higher then allowed %age discount, request will be automatically sent for PMT approval. If lower, request will be completed after FC approval. User will also have an option to write the remarks for acceptance/rejection. MR will be notified through notification after each approval/rejection. In case of Rejection only, below managers shall also be notified along with MR.

3.4 CLAIM SUBMISSION

There should be a provision for MR to submit claim against each CN and ZHO request. After acquiring approvals from all the managers, user would be allowed to submit claims against each CN/ZHO request and product. To submit the claims, application will be required to integrate with SAP HANA system to fetch the invoice details. Invoices will be further allocated to each product considering the same product was supplied against the specified invoice. User will also have an option to enter some details manually like supply quantity, Bonus amount, Bill No. and bill date. After selecting the invoice(s), user will get an option to upload bill(s) copy in PDF, JPG and PNG formats only against each bill number which was provided by MR on previous step manually. After submission, these claims will be sent to CN team for approval after approval of managers.

3.5 SAP INTEGRATION

For this module, essential integration with SAP HANA system is mandatory. SAP integration will be required for following components:

- **Fetch Invoice Details** – Each CN and ZHO request will contain products and each product will be supplied Stockist or Chemist against one or more invoices. Hence, these invoices will be required to collaborate with the product. So, to fetch the invoices information, application will be required to integrate with SAP HANA system.
- **Forward Integration** – All details of approved claims will be sent to SAP. Once approved, each claim will get a unique CN (Credit Note) number generated through SAP, and CN number will be assigned to each claim.
- **Backward Integration** – CN Number against each approved claim will be sent from SAP to Superman.

3.6 APPROVE/REJECT CLAIMS

There would be an option for user (Managers and CN team) to Accept/Reject the claims submitted by MR or FLM against each CN and ZHO request. After approvals of all the managers and FC team, MR or FLM will be able to submit the claim for each CN and ZHO request. After submission of claims, request should follow Mankind hierarchy {FLM→SLM→TLM→CN team (if required)} for claim approval. Once approved from all the managers, request will be sent to CN team for approval. CN team should have the option to select multiple claims, to approve/reject them along with remarks. MR will be notified through notification in case of Accept/Reject. In case of Rejection only, below managers shall also be notified along with MR. Remarks should be shown to MR and managers against the request.

3.7 NOTIFICATION

This module will have an option for MR to view notifications about acceptance and rejection of each manager or team in notification panel. It will be applicable for both requests like CN/ZHO request and claim submissions. A notification will stay up to 15 days. In case of Rejection only, below managers shall also be notified along with MR.

4 REFERENCES

1. Product Backlog (*CD Final final Changes March doc*)

2. Meetings & discussion points with Mankind.
3. Design Link: <https://xd.adobe.com/view/5bfd02b7-fa10-4850-b242-2f0d97acd9de-0eae/screen/ed14e44e-91d9-4d60-9ba7-3c69456fe54a?fullscreen>

5 PARTICIPANTS INVOLVED

Following is the list of participants who contributed in requirements gathering for developing the proposed Credit Note/ZHO Module & related Admin workflow:

5.1 FROM MANKIND

- Mr. Parshant Kaushik, Mankind

5.2 FROM UNEECOPS TECHNOLOGIES LTD.

- Mr. Manoj Nagpal, Program Manager
- Mr. Mohammed Ali, Technical Head
- Ms. Khushboo Sethi, Product Owner
- Mr. Deepanshu Mehta, Senior Business Analyst
- Mr. Vishwanath Chatole, Product Manager SAP

6 OUT OF SCOPE

- SAP invoice and bill generation
- SAP CN/ZHO number generation
- Addition of any new user role for Credit note/ZHO module and approval process

7 ASSUMPTIONS & DEPENDENCIES

1. This module will be developed for MR, Managers, FC team and CN team.
2. For Manager - This module will be developed for both (Web & Tablet) with online only approach. Only for PMT head, it should be online web version without tablet.
3. For MR - This module will be developed for Tablet (without Offline approach) and web.
4. For FC and CN team - This module will be developed for Web with online only approach.
5. Target device for which the application will be developed are:
6. Android Tablet (MR, FLM, SLM, TLM)
 - Galaxy Tab A7 10.4 (LTE) T505 Resolution - 2000x1200
 - Lenovo M10 Tab M10-FHD-REL (X-605LC) 3GB/32 GB/1.8 GHZ octa core PROCESSOR/10 INCH Resolution - 1920x1200
 - Browsers (all Manager, FC team and CN team)
Google Chrome - compatible with Google Chrome Ver 84+.Source for capturing the data for different sections of CN/ZHO module to be confirmed by Mankind.
7. Date format would be **DD/MM/YYYY**
8. Data source for every field of this module would SAP or Superman. For each field, data source will be provided by Mankind. It could be internal data lake.
9. Sales value should be considered on financial year level which will begin from 1st of April and end on 31 March every year.
10. For prototype, separate document has been shared on which approval also been received. Document name: "CD Final final Changes March doc Updated designs_V1.1" .

8 INTEGRATIONS

Integration needs to be done with the application as follows: -

1. Integration with OneLogin
2. SAP HANA system integration

9 FUNCTIONAL REQUIREMENTS

Functional Requirements are listed below:

9.1 TYPES OF USERS

SRS/0.2

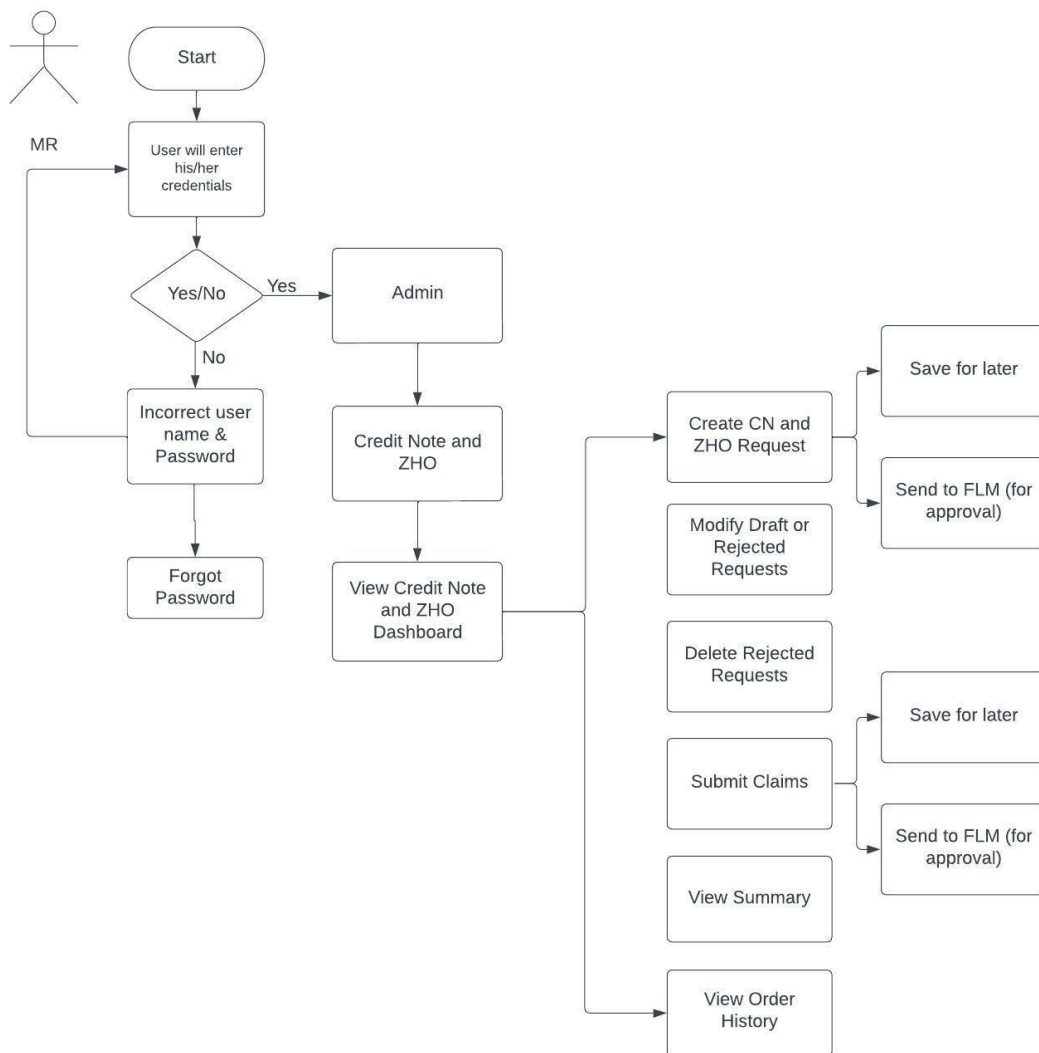

Software Requirement Specification

There will be different kind of users as listed below:

-  MR
-  Managers (FLM, SLM, TLM, PMT)
-  FC Team
-  CN Team

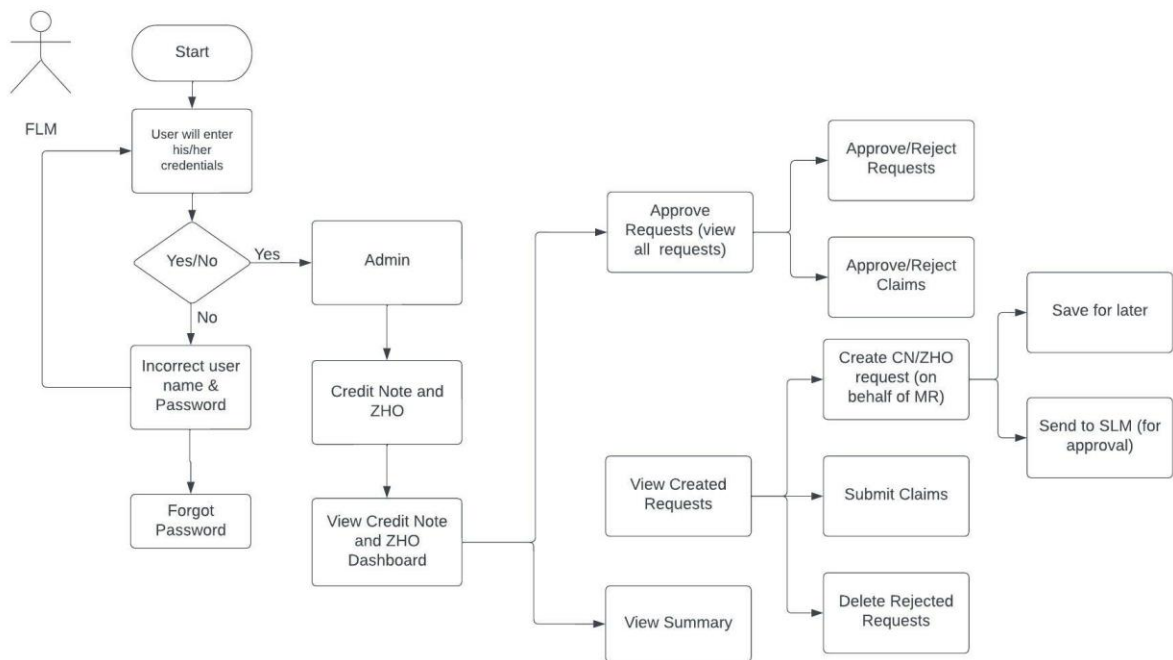

9.1.1.1 MR

Flowchart for MR

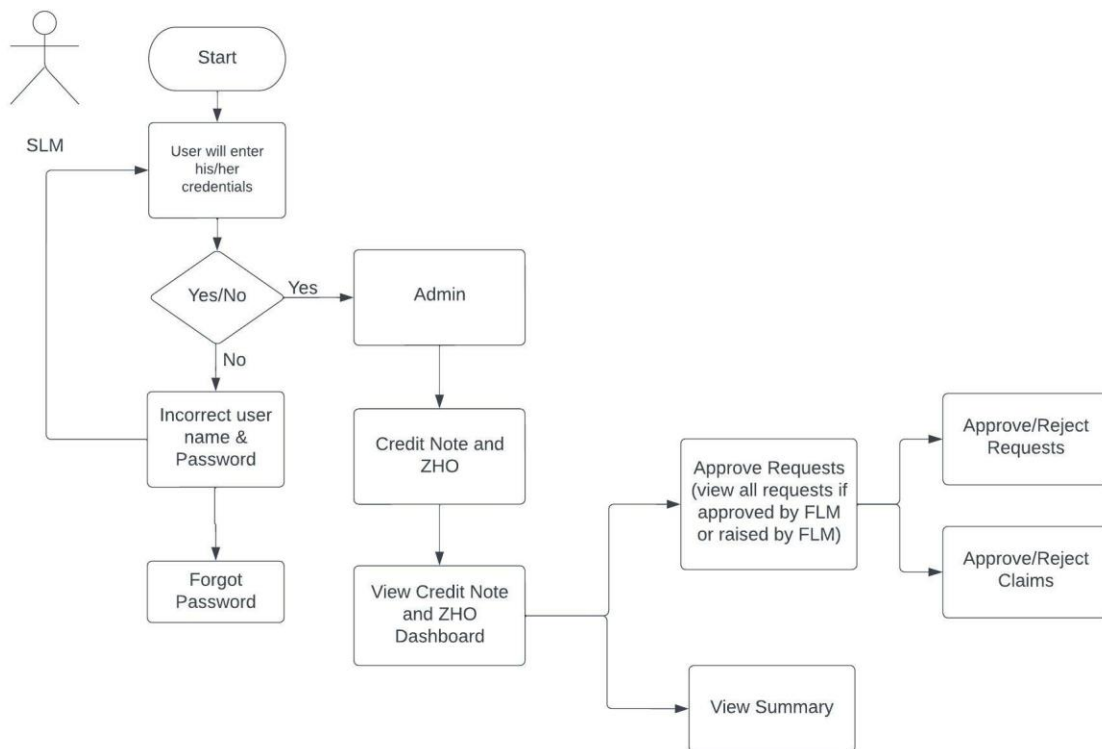

9.1.2 MANAGER FLM

Flowchart for FLM

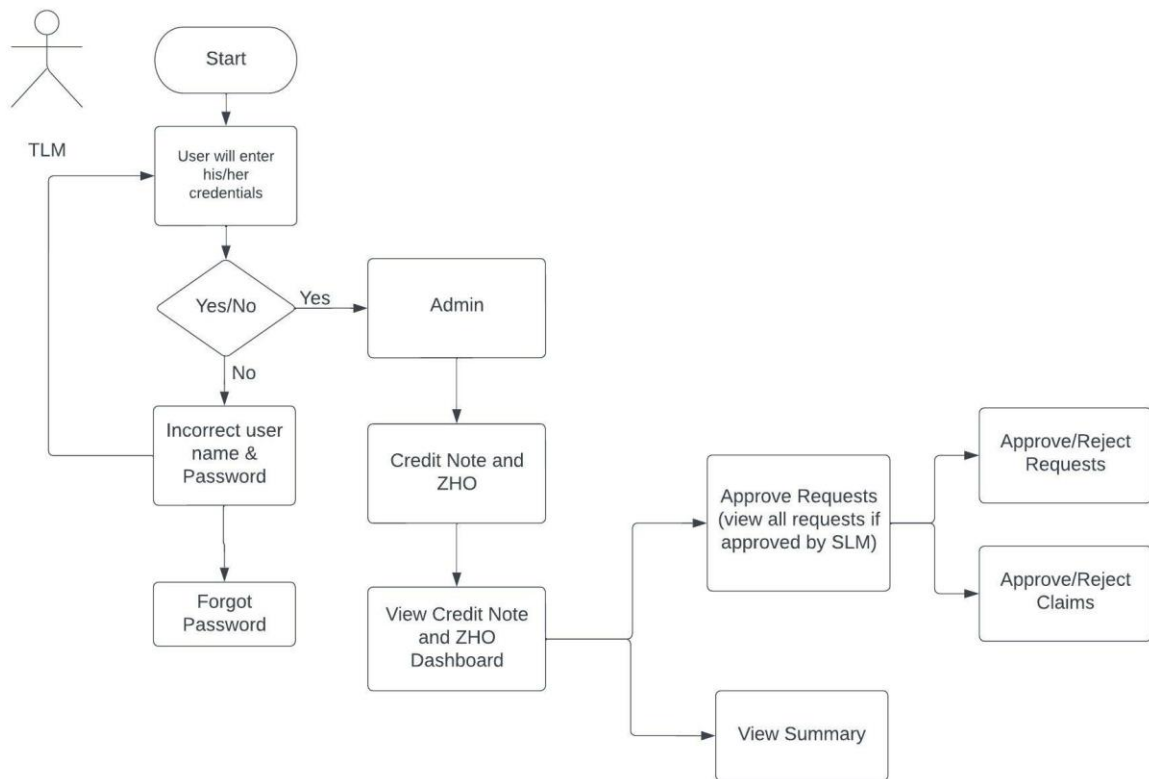

9.1.3 MANAGER SLM

Flowchart for SLM

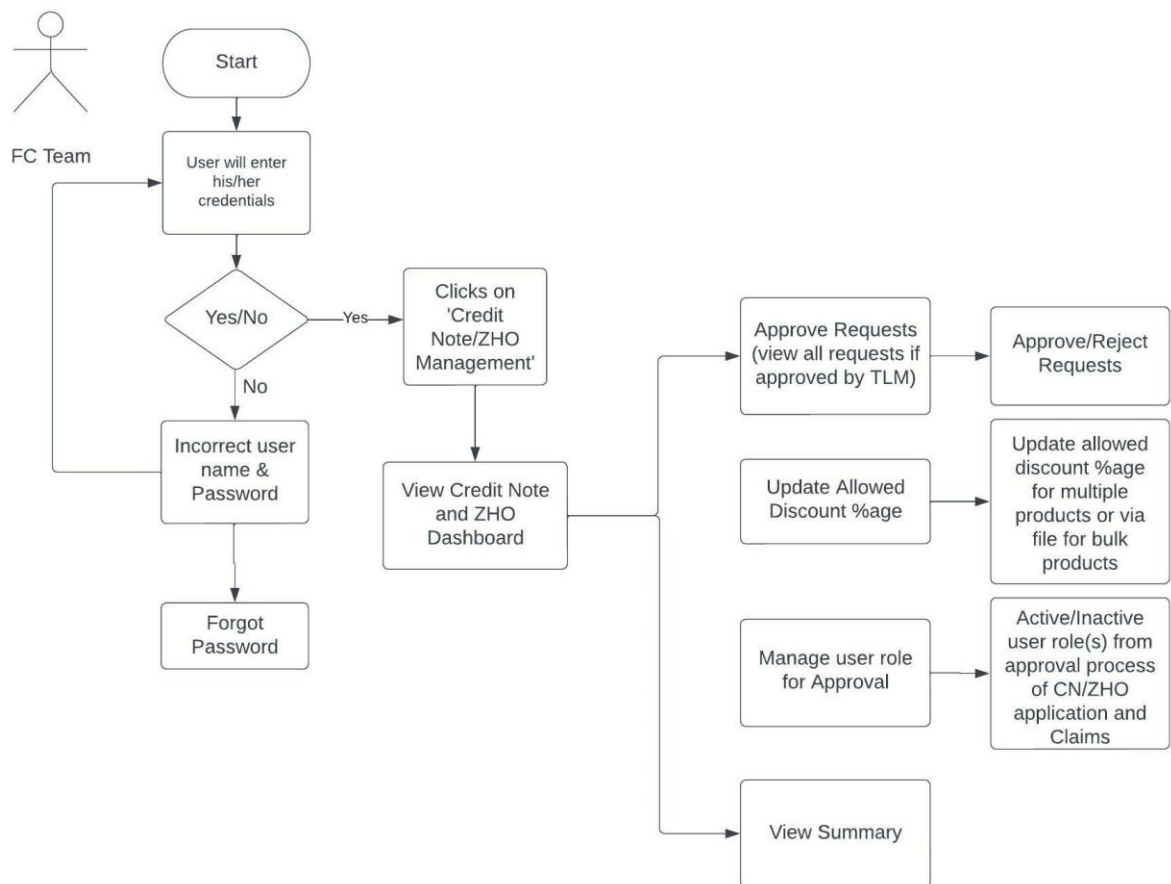

9.1.4 MANAGER TLM

Flowchart for TLM

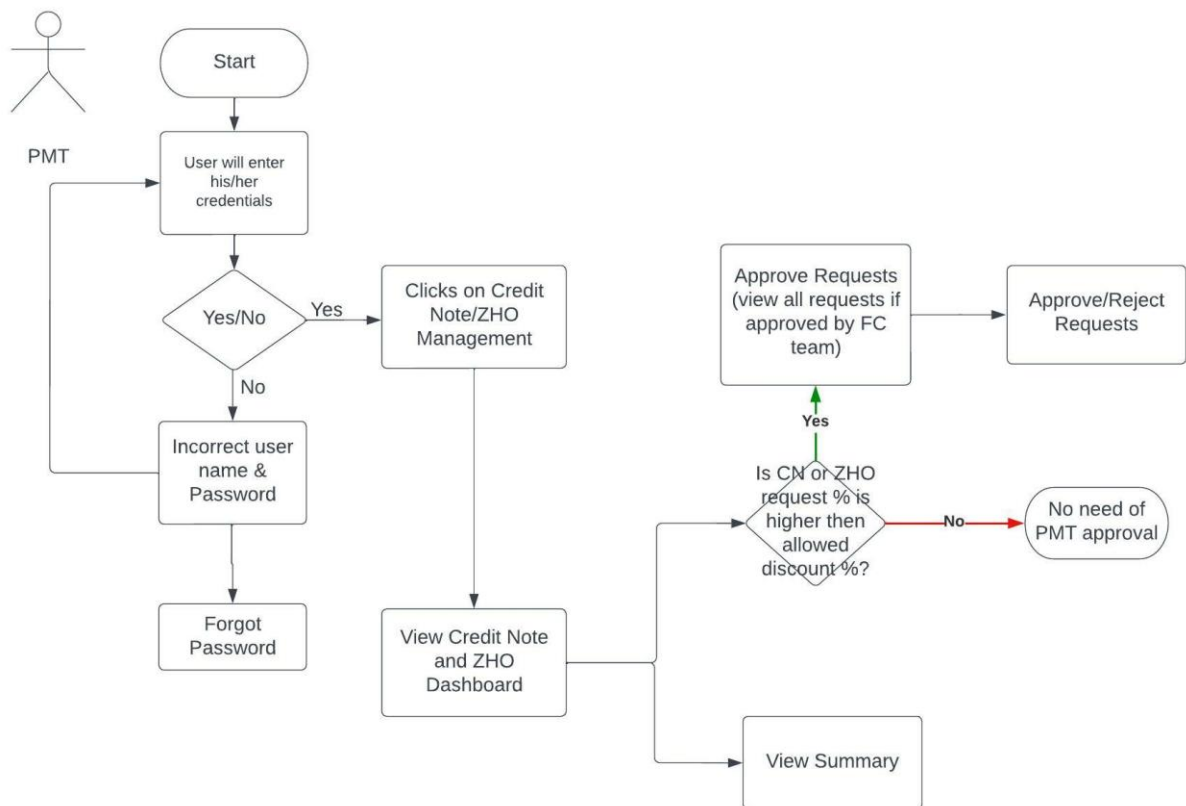

9.1.5 FC TEAM

Flowchart for FC Team

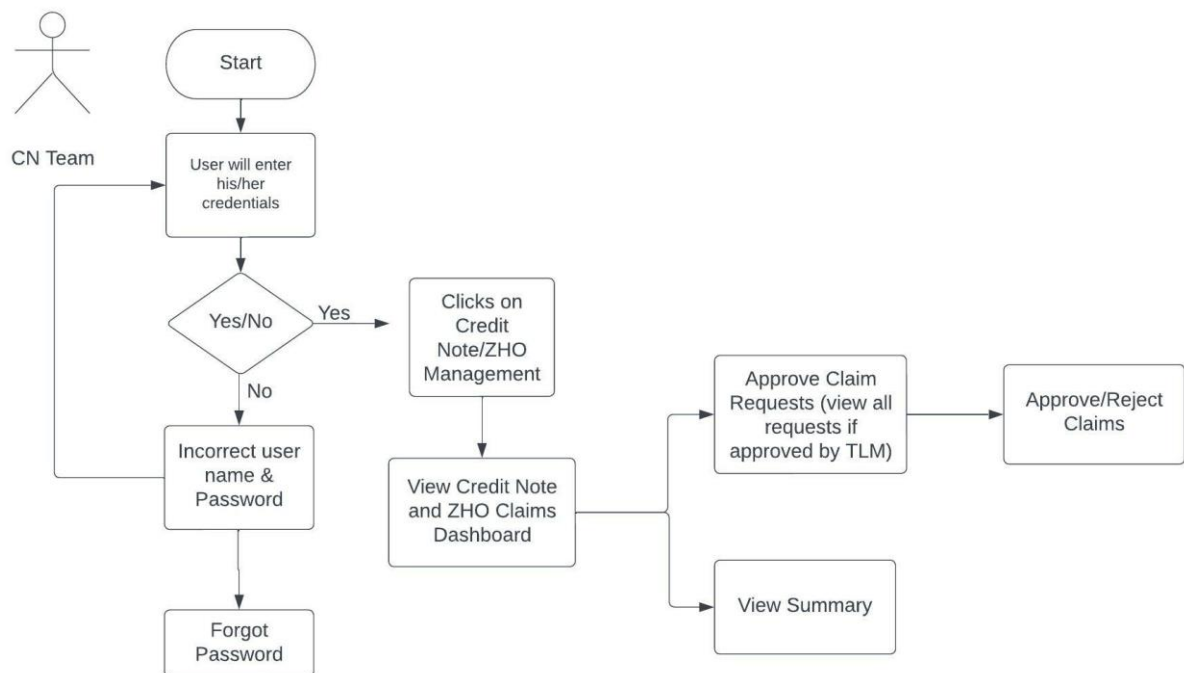

9.1.6 MANAGER PMT

Flowchart for PMT

9.1.7 CN TEAM

Flowchart for CN Team

9.2 LOGIN

Description: - Login Page will common for all pre-defined users. After successful login, users will automatically be re-directed onto their respective dashboard.

Use Case:-

Use case ID	UC-CN/ZHO-01
Use case	Login
Priority	High
Actor(s)	MR, Managers (FLM, SLM, TLM, PMT), FC team, CN team
Description	This feature will be managing access to the Credit Note and ZHO module using OneLogin. Login page provided by one login will be displayed via web view in the app

Preconditions	This use case starts when a user is not logged in to the portal and goes to the login page. User must be registered on the portal.
Post conditions	If the credentials are validated, the user is logged into the portal.
Basic flow of events	1. User clicks on Access using Onelogin button 2. The portal prompts the user for a username and password. Note: After three wrong attempts, user will get blocked & one login will have access to re-active the blocked user. 3. Will also have an option for "Forgot Password". 4. The user enters his/her username and password. 5. The portal validates the entered username and password; portal will check if the entered credentials are correct for particular user. 6. The user is signed in and navigated to the dashboard based on the user type. 7. The use case ends.
Alternative flows	If the user enters an incorrect login credentials, the portal displays an error message "Invalid Username or Password." The user can choose to either return to the beginning of the Basic Flow or cancel the login, at which point the use case ends.
Frequency	Every time, when user want to login into the system

9.3 MR FUNCTIONALITY

There would be various features available to MR in this module as described below:

9.3.1 CREDIT NOTE AND ZHO DASHBOARD

Description: - This screen will help the MR to View raised CN and ZHO requests for Doctor/Stockist/Chemist along with its status. User will also have an option to view summary of CN & ZHO requests and order history of approved/rejected CN & ZHO requests if CN number for CN and scheme for ZHO is generated in SAP and supplied bills has been approved by CN team on the basis of logged in MR.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	ZHO Requests	Tab	Along with number of open requests. Re-directs to ZHO requests page
2	Credit Note Requests	Tab	Along with number of open requests. Re-directs to CN requests page
3	Summary	Tab	Re-directs to Summary page
4	Order History	Tab	Re-directs to Order History page
5	Tab Filter	Tabs	Clickable to filter data (All, Approved, Draft, Pending, Rejected)
6	Doctor	Read Only	Autofill
7	Status	Read Only	Autofill, approved/draft/Pending/rejected
8	C&F	Read Only	Autofill
9	Stockist	Read Only	Autofill
10	Chemist	Read Only	Autofill
11	Actions	Button	Shows required respective actions for request, Re-direct to perform actions like Modify for Draft requests Submit claims for Approved requests
12	Create New Request	Button	On click, prompt with ZHO and CN

13	ZHO	Button	Clickable, to redirect to create ZHO request screen
14	Credit Note	Button	Clickable, to redirect to create CN request screen

Use Case:-

Use case ID	UC-CN/ZHO -02
Use case	Credit Note and ZHO Dashboard
Priority	High
Actor(s)	MR
Description	This feature will help the MR to view credit note and ZHO requests dashboard, redirect to summary and order history along with allowed to perform some required actions.
Preconditions	- This use case starts when user wants to view CN or ZHO requests raised by logged in MR. - User must be logged in. - User must have access to Credit Note and ZHO module.
Post conditions	- The user will able to view raised CN and ZHO requests dashboard. - User will be able to re-direct in summary page. - User will be able to re-direct in order history page. - User will also be able to perform some required actions.
Basic flow of events	- User will login in the application - User will click on the "Admin" tab from left panel. - User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. - User will be redirected to CN and ZHO dashboard - User will be able to view the following information in the dashboard: - ZHO Requests - Credit Note Requests - Summary - Order History - Tab Filter - Doctor – it will show Doctor name, specialty, location and category - Status - it will show request status from Approved, Draft, Pending and Rejected. Statuses should be denoted with following colors too:

	Approved – Turquoise Draft – Amber Pending – Amber Rejected – Red • C&F – it will show C & F name • Stockist – it will show Stockist name • Chemist – it will show Chemist name • Actions – it will show actions based on request status like: Modify – On draft requests Submit Claims – On Approved requests • Create New Request 6. User can click on ZHO requests tab to redirect on ZHO request page where user can view raised ZHO requests of logged in user. 7. User can view number of open or to be worked upon requests next to ZHO Requests tab name. 8. User can click on CN Requests tab to redirect on CN request page where user can view raised CN requests of logged in user. 9. User can view number of open or to be worked upon requests next to CN Requests tab name. 10. User can filter the CN and ZHO requests based on All, Approved, Draft, Pending and Rejected requests. 11. User can click on modify button, to get re-directed on modify request page for requests which was drafted. 12. User can Submit Claims button, to get re-directed on submit claim page on approved requests only. 13. User can click on Summary tab to redirect on Summary page where user view summary of CN and ZHO orders against total orders as per octor, Stockist and products wise. 14. User can click on Order history tab to redirect on order history page where user can view/review the history of CN and ZHO orders 15. The use case ends. Note: If a request has been approved under status but claims have not been submitted by the MR for >14 days post approval of request, the row will become red with an overdue sign (as shown) (no red row is showing in designs please confirm). In this case, a notification should be sent to MR, FLM, SLM, TLM and top line manager that claims submission is pending. The notification is applicable for both CN and ZHO requests.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on ZHO request tab. 3. User should be able to click on CN request tab. 4. There should be clickable All, Approved, Draft, Pending, rejected tabs to filter the CN or ZHO requests on the basis of respective status. On the click of each tab requests should be filtered. 5. User should be able to click on Summary tab. 6. User should be able to click on Order History tab. Note: Vacant Check

	Daily need to check MR (job) status is on duty or resigned (data source needed). In case of resigned, all the requests will be transferred to its FLM (assigned).
Frequency	Every time, when user wants to view profile information of Doctor.

9.3.2 CREATE/MODIFY CN AND ZHO REQUEST

Description: - This screen will allow user to create new CN and ZHO request by submitting required details about Doctor and product. After creating the request, each request will be sent for approval as per Mankind hierarchy. Once request has been approved from respective manager/team, it will be sent to subsequent manager or team for approval. MR will be notified on each and subsequent approval/rejection. Just before submitting the request, user will be also be able to enter remarks and save it for later. Remarks will be shown to Manager(s) and saved applications will be considered as draft which later can be modified or sent for approval.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	ZHO Requests	Tab	Along with number of open requests. Re-directs to ZHO requests page
2	Credit Note Requests	Tab	Along with number of open requests. Re-directs to CN requests page
3	Summary	Tab	Re-directs to Summary page
4	Order History	Tab	Re-directs to Order History page

SRS/0.2

Software Requirement Specification

5	Tab Filter	Tabs	Clickable to filter data (All, Approved, Draft, Rejected)
6	Doctor	Read Only	Autofill
7	Status	Read Only	Autofill, approved/draft/rejected
8	C&F	Read Only	Autofill
9	Stockist	Read Only	Autofill
10	Chemist	Read Only	Autofill
11	Actions	Button	To re-direct to perform actions like Modify for Draft requests Submit claims for Approved requests
12	Create New Request	Button	On click, prompt with ZHO and CN
13	ZHO	Button	Clickable, to redirect to create ZHO request screen
14	Credit Note	Button	Clickable, to redirect to create CN request screen
15	Yes/NO	Buttons	CN disclaimer, Yes- allow to proceed further. No- will take user to CN/ZHO dashboard screen
16	C & F	Drop down	Allows to select single C & F

17	Stockist	Drop down	Allows to select single associated Stockist
18	Select A Doctor (only one)	Read only	Text
19	Search panel (Doctor)	Text box	Search by Doctor Name
20	Doctor name, Qualification, Location and Code	Card	Allows to select Doctor
21	KYC, A, A+, A, B	Read only	Autofill, Doctor categories
22	Select Doctor Type	Drop Down	Allows to select single DR type from (Trade/Hospital Nursing Home)
23	Chemist attached to the Doctor	Drop Down	Allows to select single Chemist belongs to Doctor, Option for Self will also be given (data source needed)
24	Upload Prescription as a proof	Icon	Clickable, to upload Prescription provided by the Dr (Only PDF, JPG, PNG formats to be supported)
25	Search (Product)	Text box	Search by product name
26	Product Names	Tabs	Clickable, to select single or multiple product from priority product names
27	Add Product	Button	Clickable, to select single searched product

28	Current Requirement	Text box	Will allow to enter numbers, minimum 1 and maximum 5 length
29	Current Scheme	Text box	Will allow to enter numbers, minimum 1 and maximum 5 length
30	Required Extra	Text box	Will allow to enter numbers in form of %, minimum 1 and maximum 3 length
31	Total Bonus Scheme %	Text box	Will allow to enter numbers in form of %, minimum 1 and maximum 3 length

26	Pure Qty	Read Only	Autofill
27	Offer	Read Only	Autofill
28	Supply Qty	Text box	Clickable, will allow to enter numbers, minimum 1 and maximum 10-digit length
29	Bonus	Text box	Clickable, will allow to enter numbers, minimum 1 and maximum 5 length
30	Bill No.	Text box	Clickable, will allow to enter numbers, minimum 1 and maximum 100% length
31	Bill Date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.
32	Bill no.	Read Only	Autofill
33	Bill Date	Read Only	Autofill
34	Upload	Icon	Clickable, to upload bill copy (Only PDF, JPG, PNG formats to be supported)

Use case:

Use case ID	UC-CN/ZHO -04
Use case	Create CN and ZHO request – Submit Claims
Priority	High
Actor(s)	MR
Description	From this screen, user will be able to submit the claims against each CN or ZHO request. After acquiring approvals from all the managers, user will require to submit claims against for every CN and ZHO request against each product. To submit the claims, application must be integrated with SAP HANA system to fetch the invoice(s) details. Invoices will be further allocated to each product considering the same product was supplied against the specified invoice. User will also be able to enter some details manually like supply quantity, Bonus amount, Bill No. and bill date.

	These claims will be sent to Mankind managers hierarchy (FLM→SLM→TLM→PMT→CN team) and CN team for approval.
Preconditions	This use case starts when user wants to submit claim for approved CN or ZHO request. User must be logged in. User must also have an access of admin under superman app. User must have clicked on submit claims button from CN/ZHO dashboard.
Post conditions	The user will able to submit claims against each CN or ZHO approved request.
Basic flow of events	1. User will login in the application. 2. User will click on admin from Superman app. 3. MR will click on 'Credit Note and ZHO' tab from admin page. 4. CN and ZHO dashboard, user can view raised CN and ZHO requests separately by him/her self ▪ ZHO Requests ▪ Credit Note Requests ▪ Summary ▪ Order History ▪ Tab Filter ▪ Doctor ▪ Status ▪ C&F ▪ Stockist ▪ Chemist ▪ Actions ▪ Submit Claims 5. On the click of Submit Claims, user will be re-directed to submit claim or select invoice screen. 6. User can view list of products request under CN or ZHO request. 7. User can click on Select Invoice button against each product. 8. Application will fetch the invoices from SAP HANA system. 9. User will be able to view list of invoices. 10. User will be allowed to select single or multiple invoices against each product, considering the same product was supplied against the specified invoice. Note: User cannot select rows with different invoice numbers when one invoice number is selected, all the rows with a different invoice number should become locked. 11. After selecting the invoice(s), user can click on Proceed button, to get redirected on provide invoice details. 12. User can also be able to cancel the request by clicking on Cancel button. 13. If user clicks on Cancel button, request will be canceled and user will be re-directed to CN/ZHO dashboard 14. On Provide Invoice Details page, user can see invoice details for each Product as per his/her selection. 15. User can also edit the invoices selection by clicking on 'Edit Invoice Selection' button before moving to the next step for each product. 16. User needs to provide the following supply details as given in the Supply Bill: 16.1 Supply Qty – will allow to enter numbers

	16.2 Bonus – will allow to enter numbers 16.3 Bill No. – will allow to enter numbers 16.4 Bill Date – will open a calendar 16.5 Automated checks: ▪ Supply qty + Bonus <= Allowed qty ▪ Bonus % <= approved Bonus % for that product under CN or ZHO order ▪ Bill date should be on or after Invoice date ▪ Bill date should be on or before present date 16.6 In case of any discrepancy, an error message will be shown to user and user will not be allowed to proceed until correct details have been entered. 16.7 Error message would be: 17. Done button should remain disabled until user fills all the required details. after filling all the details Done button should enable. User can click on Done button. 18. After clicking on Done button, user will be re-directed to upload bill copy page. 19. User will be able to view unique bill number(s) which was entered in previous page by him/her self. 20. User can click on upload icon, to upload bill for each bill number. 21. User can also click on Back icon to go back on previous page. 22. After clicking on Done button, a pop up will open in which user can add remarks in text field which will be shown to Mankind hierarchy along with CN or ZHO request. 23. User can also be able to save request for later by clicking on save for later button which will save as draft and can be modified later. Same request will be shown in his/her CN and ZHO dashboard under draft status. Also, “Modify” option will be shown as an action. 24. User will be able to Modify the all the details which are required to submit the claim. 25. User can click on Send to FLM button as well to send the request to Manager for an approval. 26. User can review remarks as well provided by different managers or teams against each submitted claims while approving or rejecting. 27. The use case ends.
Acceptance Criteria	1. There should be a button for Submit Claims on dashboard. It should be clickable. It should re-direct the user to provide invoice details page. 2. There should be a button to select invoice against each product. It should be clickable. It should re-direct the user to select invoices page. 3. There should be a Done button. it should remain disabled until user fills /selects required details for each product, after provided required details for each product, done button should enable. User should be able to click on Done button. 4. Application should be able to fetch the invoice details from SAP HANA system. 5. There should be a list of invoices along with check box on each invoice on

	select invoices page. It should be selectable. User should be able to select single or multiple invoices against each product. 6. User shouldn't be allowed to select multiple rows with different invoice numbers. When one invoice number is selected, all the rows with a different invoice number should be disabled to select. 7. There should be two buttons Proceed and Cancel. Those should be clickable. Proceed should take the customer to next page and cancel should abandon the request and re-direct the user to dashboard. 8. There should be text boxes for following components for each product: 8.1 Supply Qty – will allow to enter numbers 8.2 Bonus – will allow to enter numbers 8.3 Bill No. – will allow to enter numbers 8.4 Bill Date – will open a calendar 8.5 Those text fields should be clickable. 8.6 User should be allowed to fill values in it. 8.7 Validations should be: ▪ Supply qty + Bonus <= Allowed qty ▪ Bonus % <= approved Bonus % for that product under CN or ZHO order ▪ Bill date should be on or after Invoice date ▪ Bill date should be on or before present date 8.8 Error message should be shown, If the user enters an incorrect value above mentioned fields. 9. There should be a button for Edit invoice selection. It should be clickable. It should re-direct the user to invoice selection page and allow to change his/her selections. 10. There should be a Done button. it should remain disabled until user fills /selects required details for each product, after provided required details for each product, done button should enable. User should be able to click on Done button. 11. There should be an upload icon. It should be clickable. User should be able to upload bill for each bill number. 12. User should be able allowed to upload only PDF, JPG and PNG format files. 13. User should be allowed to upload maximum 10 MB file. 14. There should be a Done button. it should remain disabled until user fills /selects required details for each product, after provided required details for each product, done button should enable. User should be able to click on Done button. 15. User should be able to click on text box and enter the remarks. 16. User should be able to click on following buttons: 16.1. Save for later Button – to save the application as draft and can be modified later 16.2. Send to FLM for Approval Button – to submit the request and send it to FLM for approval 17. User should be able to click on Modify button from CN and ZHO dashboard. 18. User should be allowed to modify all the required details for claim submission. 19. A Popup will be shown on saving the application:
--	---

	“Thanks for submitting, your claim request has been saved as draft” 20. A Popup will be shown on sending it to FLM for approval: “Thanks for submitting, your claim request has been sent for approval to FLM”
Frequency	Every time, when user want to submit claims for CN/ZHO request.

9.3.4 SUMMARY

Description: - This screen will help user to view summary of CN and ZHO requests on which Credit note or ZHO number has been generated by SAP. User will also be able view data by filters of time period (from/to date selection). User will have an option to view CN and ZHO requests segregated on the basis of total orders, sales values and Average extra discount which can be further segregated by Doctor, Stockist and product wise.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1	Summary	Tab	On click, can view or re-direct to summary page
2	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.
3	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
4	Go	Button	To apply the filters and update the summary details

5. Total Order tile			
5.1	Total Order number	Read only	Autofill, shows total no. of orders of CN and ZHO
5.2	Total Sales Value (in RS)	Read only	Autofill, shows total sales value of Pool in RS
5.3	Sales Value (in RS)	Read only	Autofill, shows total value of CN/ZHO orders in RS (invoice value after discount)
5.4	GST (in Rs)	Read only	Autofill, shows value GST based on total order in RS
5.5	Average Extra Discount	Read only	Autofill, shows average %age of discount requested via CN and ZHO requests
6. Credit Note Orders

User must also have an access of admin under superman app. User must have clicked on Summary tab from CN/ZHO dashboard. User will also be able to filter data on the basis of time duration selection.
Post conditions	The user will able to view summary of CN, ZHO and Total orders along with Doctor, Stockist and product wise
Basic flow of events	1. User will login in the application 2. User will click on the "Admin" tab from left panel. 3. User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard: a. ZHO Requests b. Credit Note Requests c. Summary d. Order History e. Tab Filter f. Doctor – it will show Doctor name, specialty, location and category g. Status - it will show request status from Approved, Draft, Pending and Rejected. Statuses should be denoted with following colors too: Approved – Turquoise Draft – Amber Pending – Amber Rejected – Red h. C&F – it will show C & F name i. Stockist – it will show Stockist name j. Chemist – it will show Chemist name k. Actions – it will show actions based on request status like: Modify – On draft requests Submit Claims – On Approved requests l. Create New Request 6. On the click on Summary tab, user will be re-directed to summary page 7. User can filter the summary by selecting time period (from/to date). 8. User can click Go button to apply the filter dates. 9. On the click of Go button, values of components showing under summary

	page will be updated with chosen time period. 10. User will be able to view summary of following components on this page: 10.1 Total order tile: 10.1.1 Total Order number – Will show total of CN and ZHO orders 10.1.2 Total Sales Value (in RS) – Will show total sales value of CN and ZHO orders on the Pool level 10.1.3 Sales Value (in RS) – Will show total sales value of CN and ZHO orders 10.1.4 GST (in Rs) – Will show total GST of CN and ZHO orders 10.1.5 Average Extra Discount – Will show total of average %age discount claimed under CN and ZHO orders 10.2 Credit Note orders tile: 10.2.1 Credit Note Order number – Will show total of CN orders only 10.2.2 % Contribution of CN to Total sales – Will show contribution of CN in %age to total sales 10.2.3 Sales Value (in RS) – Will show total sales value of CN orders only in RS. (invoice value after discount) 10.2.4 GST (in RS) – Will show total GST of CN orders only 10.2.5 Average Extra Discount – Will show total of average %age discount claimed under CN orders only 10.3 ZHO Orders tile: 10.3.1 ZHO Order number – Will show total of CN orders only 10.3.2 Sales Value (in RS) – Will show total sales value of ZHO orders only in RS. (invoice value after discount) 10.3.3 GST (in RS) – Will show total GST of ZHO orders only 10.3.4 Average Extra Discount – Will show total of average %age discount claimed under ZHO orders only 10.4 Doctors wise: 10.4.1 Doctor Name – will show Doctor name and image (assigned to MR) 10.4.2 Support – Will show average support of 3 months by Doctor in terms of selling Mankind medicines in value 10.4.3 Potential – will show potential of Doctor in value in which DR can help selling Mankind Medicines 10.4.4 Credit Note: 10.4.4.1 Total Orders – Will show total no. of CN orders Doctor wise 10.4.4.2 Sales Value – Will shows sales value of CN orders Doctor wise (invoice value after discount) 10.4.4.3 AVG. Extra Discount – Will show average %age discount of CN orders Doctor wise 10.4.5 ZHO 10.4.5.1 Total Orders – Will show total no. of ZHO orders Doctor wise 10.4.5.2 Sales Value – Will shows sales value of ZHO orders Doctor wise (invoice value after discount) 10.4.5.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Doctor wise 10.5 Stockist Wise
--	--

	10.5.1 Stockist Name – will show Stockist name without image (assigned to MR) 10.5.2 Credit Note: 10.5.2.1 Total Orders – Will show total no. of CN orders Stockist wise 10.5.2.2 Sales Value – Will shows sales value of CN orders Stockist wise (invoice value after discount) 10.5.2.3 AVG. Extra Discount – Will show average %age discount of CN orders Stockist wise 10.5.3 ZHO 10.5.3.1 Total Orders – Will show total no. of ZHO orders Stockist wise 10.5.3.2 Sales Value – Will shows sales value of ZHO orders Stockist wise 10.5.3.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Stockist wise 10.6 Product Wise 10.6.1 Product Name – will show Product name without image (assigned to MR) 10.6.2 Credit Note: 10.6.2.1 Total Orders – Will show total no. of CN orders Product wise 10.6.2.2 Sales Value – Will shows sales value of CN orders Product wise (invoice value after discount) 10.6.2.3 AVG. Extra Discount – Will show average %age discount of CN orders Product wise 10.6.3 ZHO 10.6.3.1 Total Orders – Will show total no. of ZHO orders Product wise 10.6.3.2 Sales Value – Will shows sales value of ZHO orders Product wise (invoice value after discount) 10.6.3.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Product wise 11. The use case ends. Note: Details for Credit note will be populated on this page after CN has been generated by SAP. Details for ZHO will be populated after supply bill has been approved by CN team on this page. Amount for both will be procured from SAP.
Acceptance Criteria	1. There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. 2. There should be a Go button and it should be clickable. On the click of Go button time period should be applied and data should be updated or shown on the basis of chosen time period. 3. There should be 3 tabs for Doctors, Stockist and Product. Each tab should show the data on the basis of respective tab of CN and ZHO orders.
Frequency	Every time, when user want to view summary of CN and ZHO orders.

9.3.5 ORDER HISTORY

Description: - This screen will help user to review order history, once CN number for CN request and scheme for ZHO requests will be generated in SAP. User will be able to filter the data with time period (from/to date selection) and search via claim no.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1	Order History	Tab	On click, can view or re-direct to Order history page
2	Credit Note Order	Tab	Re-directs to CN requests page
3	ZHO Order	Tab	Re-directs to ZHO requests page
4	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User cannot select previous dates.
5	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
6	Search	Text box	Search by Claim Number. Search will be applied automatically and search results will be displayed after inputting 3 characters
7	Go	Button	Clickable, To apply the filters

8	Doctor	Read Only	Autofill
9	Claim No.	Read Only	Autofill
10	CN or Scheme No.	Read Only	Autofill, shows CN number in case Credit Note and scheme no. in case of ZHO
11	Date of Extra scheme approval request	Read Only	Autofill, shows date CN/ZHO order approval of
12	Date of CN or Scheme generation	Read Only	Autofill, shows CN number generation date in case of Credit Note and scheme no. generation date in case of ZHO from SAP
13	Stockist	Read Only	Autofill
14	Station	Read Only	Autofill
15	Sales or Order Value (in RS)	Read Only	Autofill, shows sales value of order
16	GST (in RS)	Read Only	Autofill
17	Actions	Button	Show Review action on request Re-direct to review the order details

Use Case:

Use case ID	UC-CN/ZHO -06
Use case	Order History
Priority	High
Actor(s)	MR
Description	From this screen, user will be allowed to review order history of CN and ZHO requests. Data will be shown on the basis of once CN number for CN request and scheme for ZHO requests will be generated in SAP on this page. User will also be allowed to filter the data with time period (from/to date selection) and search via claim no.

Preconditions	This use case starts when user wants to review history of CN and ZHO orders. User must be logged in. User must also have an access of admin under superman app. User must have clicked on order history tab from CN/ZHO dashboard.
Post conditions	The user will able to review order history of CN and ZHO requests. User will be able to filter order history on the basis of time duration (from/to date selection) User also be able to search the order via claim number.
Basic flow of events	1. User will login in the application 2. User will click on the "Admin" tab from left panel. 3. User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard: 5.1 ZHO Requests 5.2 Credit Note Requests 5.3 Summary 5.4 Order History 5.5 Tab Filter 5.6 Doctor – it will show Doctor name, specialty, location and category 5.7 Status - it will show request status from Approved, Draft, Pending and Rejected. Statuses should be denoted with following colors too: - Approved – Turquoise - Draft – Amber - Pending – Amber - Rejected – Red 5.8 C&F – it will show C & F name 5.9 Stockist – it will show Stockist name 5.10 Chemist – it will show Chemist name 5.11 Actions – it will show actions based on request status like: - Modify – On draft requests - Submit Claims – On Approved requests 5.12 Create New Request 6. On the click on Order history tab, user will be re-directed to order history page 7. User can click on CN Requests tab, to redirect on CN order history page where user can view raised history of CN orders of logged in user. 8. User can click on ZHO requests tab, to redirect on ZHO order history page where user can view raised history of ZHO orders of logged in user. 9. User can filter the order history by selecting time period (from/to date selection). 10. User will be able to search the Claims based on Claim number. 11. User can click Go button to apply the filter dates. 12. On the click of Go button, values of components showing under order history page will be updated with chosen time period. 13. User will be able to view following components on this page: 13.1 Doctor – will show Doctor name and image 13.2 Claim No. – will show claim number

	13.3CN no. – will show CN number provided by SAP for each order 13.4Date – will show date CN/ZHO order approval of 13.5Date of CN generation (in case of CN) – will show CN number generated by SAP 13.6Date of scheme generation (in case of ZHO) – will show scheme generation number generated by SAP 13.7Stockist – will show Stockist name 13.8Station – will show station 13.9Sales Value (in RS) – will show sales value of order in RS (invoice value after discount) 13.10 GST (in RS) – will show GST value of order in RS 13.11 Actions – will show Review action for each order 14. On click of Review button, a pop-up will be open where user can view order details. From where user will be able to download request review page details as well in PDF format by clicking on download icon. 15. The use case ends.
Acceptance Criteria	- There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. - There should be a Go button and it should be clickable. On the click of Go button time period should be applied and data should be updated or shown on the basis of chosen time period. - Search - User will be able to search the claims based on Claim number. - User will be able to click search bar. - User will be able to input in the search bar. - Search will be applied automatically and search results will be displayed after inputting 3 numbers. - On inputting any number in search bar, a cross icon should be displayed to user in search bar. - User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. - On click cross icon, search input will be reset and data in list will be displayed accordingly. - There should be a Review button and it should be clickable. On the click of review button, user should be re-directed to review pop-up. On Review page, there should be a Download icon. It should be clickable and download the review page details in PDF format.
Frequency	Every time, when user want to view history of CN and ZHO order separately.

9.4 FLM MANAGER FUNCTIONALITY

There would be various features available to FLM in this module as described below:

9.4.1 CREDIT NOTE AND ZHO DASHBOARD

Description: - This screen will help the FLM to view all/open CN and ZHO requests for FLM approval which was raised for Doctor/Stockist/Chemist by MR (all the MR's mapped with FLM) and created CN and ZHO requests by FLM (on behalf of MR) separately along with its status and required actions. User will also have an option to view summary of CN and ZHO requests on the basis of logged in FLM.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Requests	Tab	Clickable, shows along with number of open requests. Re-directs to ZHO requests page
2	Created Requests	Tab	Clickable, shows along with number of open requests. Re-directs to CN requests page
3	Summary	Tab	Re-directs to Summary page
4	Credit Note Requests	Tab	Re-directs to CN requests page
5	ZHO Requests	Tab	Re-directs to ZHO requests page
6	Tab Filter	Tabs	Clickable to filter data (All, Prior approval, claim submission, Approved)
7	Search	Text box	Search by Claim Number. Search will be applied automatically and search results will be displayed after inputting 3 characters
8	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.

9	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
10	Select MR	Drop Down	Shows all the MR's assigned with logged in FLM, allows to select single MR from drop down
11	Go	Button	To apply the filters
12	Claim No.	Read Only	Autofill
13	Date	Read Only	Autofill, shows date of
14	Stockist	Read Only	Autofill
15	Station	Read Only	Autofill
16	Status	Read Only	Autofill, Prior approval pending, claim approval pending, claim approval by SL, TL, PMT, FC, CN (manager or team)
17	Sales value (in RS.)	Read Only	Autofill, shows sales Value (in Rs) for that order (invoice value after discount)
18	Actions	Button	Shows required respective actions for request, To re-direct to perform actions like Check Application (for CN/ZHO application approvals)/ Check Claim (for claims submission) / Review (for approved)
19	Back	Icon	Clickable, to re-direct user to previous page (Credit Note and

			ZHO Requests selection page)
--	--	--	------------------------------

Use Case:-

Use case ID	UC-CN/ZHO -07
Use case	Credit Note and ZHO Dashboard
Priority	High
Actor(s)	FLM
Description	This dashboard will help the FLM to view all/open CN and ZHO requests for FLM approval which was raised for Doctor/Stockist/Chemist by MR(s) (all the MR's assigned with FLM) and created CN and ZHO requests by FLM (on behalf of MR) separately along with its status and required actions. User will also be able to view summary of CN and ZHO requests.
Preconditions	This use case starts when user wants to view CN or ZHO open approval requests for logged in FLM raised by assigned MR's. User must be logged in. User must have access to Credit Note and ZHO module.
Post conditions	- The user will able to view open CN and ZHO requests for FLM approval along with its status and required actions. - User will be able to filter requests. - User will be able to search requests based on claim no. - User will be able to re-direct on Created requests and summary pages. - User will be able to re-direct on check application, check claims page to approve application or claim. User can also be able to re-direct to review page.
Basic flow of events	- User will login in the application - User will click on the "Admin" tab from left panel. - User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. - User will be redirected to CN and ZHO dashboard - User will be able to view the following information in the dashboard: - Approve Requests – Shows Credit Note and ZHO request tab separately - Created Requests – Shows Credit Note and ZHO request tab separately - Summary - Tab Filter – To filter requests based on All, Prior approval (application pending for FLM approval), Claim submission approval (claim pending for FLM approval), Approved (applications and

	claims) e. Claim no. – to search request via claim no. f. Select MR – to filter request on the basis of selected single MR from drop down g. Claim no. – Shows claim number h. Date - shows date of i. Stockist j. Station k. Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: Application Approved by SL, TL, PMT, FC or CN – Turquoise Claim Approved by SL, TL or CN – Turquoise Prior Approval Pending – Amber Claim Approval Pending – Amber Prior Approval Pending by SL, TL, PMT, FC – Amber Claim Approval Pending by SL, TL, CN – Amber Application Rejected by SL, TL, PMT or FC – Red Claim Rejected by SL, TL or CN – Red l. Sales Value (in RS.) of order (invoice value after discount) m. Actions – it will show actions based on request status like: Check application – On open approval requests for CN and ZHO application Check claim – On open approval request for claim submitted by MR's Review – On Approved requests 6. User can click on Approve Requests tab to redirect view all the CN and ZHO request separately. By default, user will land on this page after the selection of Credit Note and ZHO from previous screen. a. User can click on Credit note Requests to redirect on CN requests page where user can view raised CN requests from all assigned MR's. b. User can click on ZHO Requests to redirect on ZHO request page where user can view raised ZHO requests from all assigned MR's 7. User can view number of open or to be worked upon requests next to Approve Requests and Created Requests tabs. 8. User can filter the CN and ZHO requests based on All, Prior approval, claims submission and Approved. 9. User can view all pending application approval requests, on the click of prior approval tab. 10. User can view all approved Credit note/ZHO requests, on the click of approved tab. 11. User can view all pending claim approval requests, on the click of claims submission tab. 12. User can filter the data by selecting time period (from/to date). 13. User can also filter the requests by selecting one of the MR's from assigned MR's drop down.
--	--

	14. User can search the request by claim no. as well. 15. User can click on Go button, to apply filters and requests will be filtered on the basis of time duration or/and MR selection. 16. User can click on Check Application, to get re-directed on approve application page. 17. User can click on Check Claim, to get re-directed on approve claim page. 18. User can click on Review button, to get redirected to review details page for approved requests. From where user will be able to download request review page details as well in PDF format by clicking on download icon. 19. User can also click on Summary tab to get redirected on Summary page. 20. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Created requests tab. 4. User should be able to click on Credit Note requests under approve requests. 5. User should be able to click on ZHO requests under approve requests 6. User should be able to click on Credit Note requests under Created requests. 7. User should be able to click on ZHO requests under Created requests 8. There should be clickable All, Prior Approval, claims submission and Approved tabs to filter the CN or ZHO requests. On the click of each tab request should be filtered. 9. There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. 10. There should be MR drop down. It should be clickable. User will be allowed to select single MR from assigned MR's to FLM. 11. Search - User will be able to search the claims based on Claim number. 11.1 User will be able to click search bar. 11.2 User will be able to input in the search bar. 11.3 Search will be applied automatically and search results will be displayed after inputting 3 numbers. 11.4 On inputting any number in search bar, a cross icon should be displayed to user in search bar. 11.5 User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. 11.6 On click cross icon, search input will be reset and data in list will be displayed accordingly. 12. There should be a Go button and it should be clickable. On the click of Go button, filters should be applied and data should be updated or shown on the basis respective filters. 13. User should be able to click on Summary tab. 14. User should be able to click on Check application, Check claim and Review buttons to get redirected on respective page. 15. On Review page, there should be a Download icon. It should be clickable and download the review page details in PDF format.
Frequency	Every time, when user wants view all open CN and ZHO requests for FLM approval and take respective actions.

9.4.2 APPROVE/REJECT CN/ZHO REQUESTS

Description: - This screen will allow user to Accept/Reject the CN and ZHO requests raised by MR's. After creating the request, each request will be sent for approval as per Mankind hierarchy which is {FLM→SLM→TLM→FC→PMT (if required)}. Once request has been approved from FLM, it will be sent to subsequent manager (SLM) for approval. Before the SLM approval, request must be approved by FLM. User will have an option to write the remarks for acceptance/rejection. In case of acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Application	Button	Clickable, to approve the application
2	Reject	Button	Clickable, to reject the application
3 Approval Status			
3.1	Prior approval	Read Only	Auto fill, shows application approval status of each manager and team
3.2	Claims Approval	Read Only	Auto fill, shows claim approval status of each manager and team
4 Request Details			
4.1	Created BY	Read Only	Auto fill, shows name of MR who created the request

SRS/0.2

Software Requirement Specification

4.2	Claim No.	Read Only	Auto fill, shows Claim no.
4.3	Date	Read Only	Auto fill, shows date of
4.4	C & F	Read Only	Auto fill, shows C & F name selected by MR while creating request
4.5	Stockist	Read Only	Autofill, shows Stockist name selected by MR while creating request
4.6	Doctor	Read Only	Autofill, shows Doctor name selected by MR while creating request
4.7	Speciality	Read Only	Autofill, shows speciality of Doctor selected by MR while creating request
4.8	Region	Read Only	Autofill, shows region of Doctor belongs to
4.9	Doctor's type	Read Only	Autofill, shows type of Doctor selected by MR while creating request
4.10	Chemist attached to Doctor	Read Only	Autofill, shows Chemist attached to Doctor selected by MR while creating request
4.11	Doctor's prescription	Read Only	Autofill, allows to download Doctor prescription, uploaded by MR while creating request
4.12	Doctor Potential	Read Only	Autofill, Doctor potential in RS (average of 3 months) Source Superman app or SAP
4.13	Doctor Support	Read Only	Autofill, Doctor Support in RS (average of 3 months) Source

			Superman app or SAP
4.14	Requests raised this quarter	Read Only	Autofill, show number of requests raised for Doctor in this quarter, including Pending, Approved, Rejected
4.15	Bonus amount raised this quarter	Read Only	Autofill, bonus amount in RS on the basis of request raised for Doctor in this quarter, Source Superman app or SAP
4.16	Request raised this quarter by Stockist	Read Only	Autofill, request raised for specific Stockist for same Doctor in this quarter, Source Superman app or SAP
5 Product Details Mankind			
5.1	Selected products	Read Only	Autofill, shows list of products for which request has been created
5.2	Required extra	Read Only	Autofill, shows extra %age discount requested in request for specific product
5.3	Monthly Consumption	Read Only	Autofill, shows number of monthly consumptions of specific product
5.4	Bonus	Read Only	Autofill, shows bonus value
5.5	Company Name	-	Will be blank for Mankind products always
6 Product Details Competitor			
6.1	Selected products	Read Only	Autofill, shows list of competitor product against each product if added by MR while creating request

SRS/0.2

Software Requirement Specification

6.2	Required extra	Read Only	Autofill, shows extra %age discount filled by MR for competitor product
6.3	Monthly Consumption	Read Only	Autofill, shows number of monthly consumptions filled by MR for competitor product
6.4	Bonus	Read Only	Autofill, shows bonus value filled by MR for competitor product
6.5	Company Name	Read Only	Autofill, shows company name of product filled by MR for competitor product
7 Remarks			
7.1	MR's Remarks	Read Only	Autofill, shows Remarks entered by MR before sending the request for approval
7.2	Enter your remarks	Text box	Allows FLM to enter his/her remarks before approval

Use Case:-

Use case ID	UC-CN/ZHO -08
Use case	Approve/Reject CN and ZHO requests
Priority	High
Actor(s)	FLM
Description	From this screen, user will be able to Accept/Reject the CN and ZHO requests raised by MR's. After creating the request, each request will be sent for approval as per Mankind hierarchy which is {FLM→SLM→TLM→FC→PMT (if required)}. Once request has been approved from FLM, it will be sent to subsequent manager (SLM) for approval. Before the SLM approval, request must be approved by FLM. User will

	have an option to write the remarks for acceptance/rejection. In case of acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.
Preconditions	This use case starts when user wants to approve/reject CN or ZHO open requests for logged in FLM approval raised by assigned MR's. User must be logged in. User must have access to Credit Note and ZHO module.
Post conditions	• The user will able to view open CN and ZHO requests for FLM approval along with its status and required actions. • User will be able to view details like approval status, request details, product details and remarks entered by MR. • User will be able to approve/reject open CN and ZHO requests for FLM approval. • User will also be able to enter remarks before approve/reject the request.
Basic flow of events	1. User will login in the application 2. User will click on the "Admin" tab from left panel. 3. User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard: 5.1. Approve Requests – Credit Note and ZHO request tab separately 5.2. Created Requests – Credit Note and ZHO request tab separately 5.3. Summary 5.4. Tab Filter – To filter requests based on All, Prior approval (application pending for FLM approval), Claim submission approval (claim pending for FLM approval), Approved (applications and claims) 5.5. Claim no. – to search request via claim no. 5.6. Select MR – to filter request on the basis of selected single MR from drop down 5.7. Claim no. – shows claim number 5.8. Date - shows date of 5.9. Stockist 5.10. Station 5.11. Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: - Application Approved by SL, TL, PMT, FC or CN – Turquoise - Claim Approved by SL, TL or CN – Turquoise - Prior Approval Pending – Amber - Claim Approval Pending – Amber - Prior Approval Pending by SL, TL, PMT, FC – Amber - Claim Approval Pending by SL, TL, CN – Amber - Application Rejected by SL, TL, PMT or FC – Red - Claim Rejected by SL, TL or CN – Red 5.12. Sales Value (in RS.) of order (invoice value after discount) 5.13. Actions – it will show actions based on request status like: - Check application – On open approval requests for CN and ZHO

	application Check claim – On open approval request for claim submitted by MR's Review – On Approved requests 6. User Clicks on Approve Requests tab to get redirected and view all the CN and ZHO request separately. 6.1. User can click on Credit note Requests to redirect on CN requests page where user can view raised CN requests from all assigned MR's and him/her self. 6.2. User can click on ZHO Requests to redirect on ZHO request page where user can view raised ZHO requests from all assigned MR's and him/her self. 7. User Clicks on Check Application, to get re-directed on approve application page. 8. User will be able to view details like approval status, request details, product details and remarks entered by MR. 8.1 Approval status 8.1.1 Prior approval – will show application approval status of each manager and team. 8.2 Approval status 8.1.2 Claims approval – will show Claim approval status of each manager and team. 8.2 Request Details 8.2.1 Created By – will show name of MR who created the request 8.2.2 Claim No. – will show Claim no. 8.2.3 Date – will show Date of 8.2.4 C & F – will show C & F name 8.2.5 Stockist – will show Stockist name 8.2.6 Doctor – will show Doctor name 8.2.7 Specialty – will show Doctor specialty 8.2.8 Region – will show Doctor region 8.2.9 Doctor's type – will show type of Doctor selected by MR while creating request 8.2.10 Chemist attached to Doctor – will show Chemist attached to Doctor selected by MR while creating request 8.2.11 Doctor's prescription – will download Doctor prescription, uploaded by MR while creating request 8.2.12 Doctor Potential – will show Doctor potential in RS (average of 3 months) Source Superman app or SAP 8.2.13 Doctor Support – will show Doctor Support in RS (average of 3 months) Source Superman app or SAP 8.2.14 Requests raised this quarter – will show number of requests raised for Doctor in this quarter, including Pending, Approved, Rejected 8.2.15 Bonus amount raised this quarter – will show bonus amount in RS on the basis of request raised for Doctor in this quarter, Source Superman app or SAP 8.2.16 Request raised this quarter by Stockist – will show request raised for specific Stockist for same Doctor in this quarter, Source Superman app or SAP
--	--

	8.3 Product details of Mankind and Competitor 8.3.1 Selected products – will show list of products for which request has been created 8.3.2 Required extra – will show extra %age discount requested in request for specific product 8.3.3 Monthly Consumption – will show number of monthly consumptions of specific product 8.3.4 Bonus – will show bonus value 8.3.5 Company Name – Will be blank for Mankind products always 8.3.1 Selected products (competitor) – will list of competitor product against each product if added by MR while creating request 8.3.2 Required extra (competitor) – will show extra %age discount filled by MR for competitor product 8.3.3 Monthly Consumption (competitor) – will show number of monthly consumptions filled by MR for competitor product 8.3.4 Bonus (competitor) – will show bonus value filled by MR for competitor product 8.3.5 Company Name (competitor) – will show company name of product filled by MR for competitor product 8.4 Remarks 8.4.1 MR's Remarks – will show MR's remarks 8.4.2 Remarks – will allow user to enter remarks in text box 9. User can also be able to download Doctor's prescription, by clicking on file name showing below Doctor's prescription field under request details section which was uploaded by MR. 10. User can enter remarks in text box before approving and rejecting the request. MR would also be able to view FLM remarks. 11. User can click on Approve button, to approve the application. Once approved by FLM, request will be sent for SLM approval and MR will be notified. 12. User can click on Reject button, to reject the application. Once rejected by FLM, request will not be sent for SLM approval and MR and below manager(s) will be notified. 13. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. User should be able to click on Check application button to get redirected on application approval page. 6. User should be able to view Doctor's prescription file name. it should be clickable. If user clicks on file name, it should be downloaded. 7. There should be an Approve Application button. It should be clickable. On click of approve application button, request should be approved and sent to SLM for approval. MR also should be notified. 8. There should be a Reject button. It should be clickable. 6 Supply Bills			
6.1	Bill no.	Read Only	Autofill, shows bill no.
6.2	Bill Date	Read Only	Autofill, shows bill date
6.3	Bill Copy	Button	Clickable, shows bill copy(s) which was uploaded by MR
7 Remarks			
7.1	MR's Remarks	Read Only	Autofill, shows Remarks entered by MR before sending the request for approval
7.2	Enter your remarks	Text box	Allows FLM to enter his/her remarks before approval

Use Case:-

Use case ID	UC-CN/ZHO -11
Use case	Approve/Reject Claims
Priority	High
Actor(s)	FLM
Description	From this screen, user will be able to Accept/Reject the claims submitted by MR's against each CN or ZHO request. Once request has been approved from FLM, it will be sent to subsequent manager (SLM) for approval. Before the SLM approval, request must be approved by FLM. User will also have an option to write the remarks for acceptance/rejection. MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR. User will also be able to view and download supply bill which was uploaded by MR's.

Preconditions	This use case starts when user wants to approve/reject open claim requests for logged in FLM approval submitted by assigned MR's. User want to view and download supply bills. User must be logged in. User must have access to Credit Note and ZHO module.
Post conditions	• The user will able to view open claims for FLM approval along with its status and required actions. • User will be able to view details like approval status, request details, product details, supply details and remarks entered by MR. • User will also be able to view and download supply bills for each claim which was uploaded by MR's. • User will be able to approve/reject open claims for FLM approval. • User will also be able to enter remarks before approve/reject the claim.
Basic flow of events	1. User will login in the application 2. User will click on the "Admin" tab from left panel. 3. User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard: 5.1. Approve Requests – shows Credit Note and ZHO request tab separately 5.2. Created Requests – shows Credit Note and ZHO request tab separately 5.3. Summary 5.4. Tab Filter – To filter requests based on All, Prior approval (application pending for FLM approval), Claim submission approval (claim pending for FLM approval), Approved (applications and claims) 5.5. Claim no. – to search request via claim no. 5.6. Select MR – to filter request on the basis of selected single MR from drop down 5.7. Claim no. – shows claim number 5.8. Date - shows date of 5.9. Stockist 5.10. Station 5.11. Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: - Application Approved by SL, TL, PMT, FC or CN – Turquoise - Claim Approved by SL, TL or CN – Turquoise - Prior Approval Pending – Amber - Claim Approval Pending – Amber - Prior Approval Pending by SL, TL, PMT, FC – Amber - Claim Approval Pending by SL, TL, CN – Amber - Application Rejected by SL, TL, PMT or FC – Red - Claim Rejected by SL, TL or CN – Red 5.12. Sales Value (in RS.) of order (invoice value after discount) 5.13. Actions – it will show actions based on request status like: - Check application – On open approval requests for CN and ZHO application

	Check claim – On open approval request for claim submitted by MR's Review – On Approved requests 6. User Clicks on Approve Requests tab to get redirected and view all the CN and ZHO request separately. 7. User can click on Credit note Requests to redirect on CN requests page where user can view raised CN requests from all assigned MR's and him/her self. 8. User can click on ZHO Requests to redirect on ZHO request page where user can view raised ZHO requests from all assigned MR's and him/her self. 9. User Clicks on Check Claim, to get re-directed on approve claim page. 10. User will be able to view details like approval status, request details, product details, Supply bills and remarks entered by MR. 10.1 Approval status 10.1.1 Prior approval – will show application approval status of each manager and team. 10.1.2 Claims approval – will show claim approval status of each manager and team. 10.2 Request Details 10.2.1 Created By – will show name of MR who created the request 10.2.2 Claim No. – will show Claim no. 10.2.3 Date – will show Date of 10.2.4 C & F – will show C & F name 10.2.5 Stockist – will show Stockist name 10.2.6 Doctor – will show Doctor name 10.2.7 Specialty – will show Doctor specialty 10.2.8 Region – will show Doctor region 10.2.9 Doctor's type – will show type of Doctor selected by MR while creating request 10.2.10 Chemist attached to Doctor – will show Chemist attached to Doctor selected by MR while creating request 10.3 Product details of each product 10.3.1 Product Name – will show product name 10.3.2 Invoice No. – will show invoice number 10.3.3 Batch – will show batch name 10.3.4 Date – will show date of 10.3.5 MRP – will show product MRP 10.3.6 PTR – will show price of product to retailer 10.3.7 PTS – will show price of product to Stockist 10.3.8 Supply Qty – will show supplied quantity of product under order 10.3.9 Bonus – will show bonus value 10.3.10 IN% – will show IN %age 10.3.11 Total Qty. – will show total quantity of order 10.3.12 Cons – will show cons 10.3.13 Allowed Qty – will show allowed quantity of product 10.3.14 Bill No. – will show bill no. 10.3.15 Bill Date – will show bill date 10.4 Supply Bills 10.4.1 Bill No. – will show bill no.
--	--

	10.4.2 Bill Date – will show bill date 10.4.2 Bill Copy – Clickable, will show bill copy(s) name and allow user to view download respective bill 10.4 Remarks 10.4.1 MR's Remarks – will show MR's remarks 10.4.2 Remarks – will allow user to enter remarks in text box 11. User can also be able to download Doctor's prescription, by clicking on file name showing below Doctor's prescription field under request details section which was uploaded by MR. 12. User can also be able to view and download supply bill(s) uploaded by MR's, by clicking on bill copy name showing below bill copy field under supply bills section which was uploaded by MR. 13. User will be able to enter remarks in text box before approving/rejecting the request. Those remarks will be shown to MR and Managers both. 14. User can click on Approve Claim button, to approve the claim. Once approved by FLM, claim will be sent to SLM for approval and MR will be notified. 15. User can click on Reject button, to reject the claim. Once rejected by FLM, request will not be sent for SLM approval and MR will be notified. In case of Rejection only, below managers shall also be notified along with MR. 16. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. User should be able to click on Check Claim button to get redirected on claim approval page. 6. User should be able to view Doctor's prescription file name. it should be clickable. If user clicks on file name, it should be downloaded. 7. User should be able to view supply bill(s) file names. it should be clickable. If user clicks on file name, it should be viewable and downloaded too. 8. There should be an Approve Claim button. It should be clickable. On click of approve claim button, claim should be approved and sent to SLM for approval. MR also should be notified. 9. There should be a Reject button. It should be clickable. On click of reject button, claim should be rejected and will not be sent to SLM for approval. MR also should be notified. In case of Rejection only, below managers shall also be notified along with MR. 10. There should a text box for user to enter remarks. It should be clickable. Remarks would be mandatory for rejection. Note: Vacant Check If an FLM/SLM is vacant, and no action is taken for 48 hours, then it will be forwarded to the next level and approval status show Vacant (no action taken). (E.g. if FLM is vacant, then it will be escalated to SLM. If SLM is vacant, it will be escalated to TLM)
Frequency	Every time, when user wants view and approve/reject all open claims for FLM approval.

9.4.6 SUBMIT CLAIMS

Description: - This screen will help the user to submit the claims against each CN or ZHO request which was created by him/her self (on behalf of MR). After acquiring approvals from all the managers, user would be able to submit claims against for every CN and ZHO against each product. To submit the claims, application will be integrated with **SAP HANA** system to fetch the invoice details. Invoices will be further allocated to each product considering the same product was supplied against the specified invoice. User will also have an option to enter some details manually like supply quantity, Bonus amount, Bill No. and bill date. These claims will be sent to Mankind managers hierarchy (SLM→TLM→CN team) and CN team for approval.

Use case:

Use case ID	UC-CN/ZHO -12
Use case	Create CN and ZHO request – Submit Claims
Priority	High
Actor(s)	FLM
Description	From this screen, user will be able to submit the claims against each CN or ZHO request created by him/her self (on behalf of MR). After acquiring approvals from all the managers, user will require to submit claims against for every CN and ZHO request against each product. To submit the claims, application will be integrated with SAP HANA system to fetch the invoice(s) details. Invoices will be further allocated to each product considering the same product was supplied against the specified invoice. User will require to enter some details manually like supply quantity, Bonus amount, Bill No. and Bill date. These claims will be sent to Mankind managers hierarchy (SLM→TLM→CN team) and CN team for approval.
Preconditions	This use case starts when user wants to submit claim for approved CN or ZHO request which was created by him/her self on behalf of MR.

	User must be logged in. User must also have an access of admin under superman app. User must have clicked on submit claims button from created requests screen.
Post conditions	The user will able to submit claims against each CN or ZHO approved request which was created by him/her self on behalf of MR.
Basic flow of events	1. User will login in the application 2. User will click on the "Admin" tab from left panel. 3. User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard: 5.1. Approve Requests – Credit Note and ZHO request tab separately 5.2. Created Requests – Credit Note and ZHO request tab separately 5.3. Summary 5.4. Tab Filter – To filter requests based on All, Prior approval (application pending for FLM approval), Claim submission approval (claim pending for FLM approval), Approved (applications and claims) 5.5. Claim no. – to search request via claim no. 5.6. Select MR – to filter request on the basis of selected single MR from drop down 5.7. Claim no. 5.8. Date - shows date of 5.9. Stockist 5.10. Station 5.11. Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: - Application Approved by SL, TL, PMT, FC or CN – Turquoise - Claim Approved by SL, TL or CN – Turquoise - Prior Approval Pending – Amber - Claim Approval Pending – Amber - Prior Approval Pending by SL, TL, PMT, FC – Amber - Claim Approval Pending by SL, TL, CN – Amber - Application Rejected by SL, TL, PMT or FC – Red - Claim Rejected by SL, TL or CN – Red 5.12. Sales Value (in RS.) of order (invoice value after discount) 5.13. Actions – it will show actions based on request status like: - Check application – On open approval requests for CN and ZHO application - Check claim – On open approval request for claim submitted by MR's - Review – On Approved requests 6. User clicks on Created Requests tab. 7. User will be able to view the following information on Create Requests tab: 7.1 Tab Filter 7.2 Doctor – it will show Doctor name, specialty, location and category 7.3 Status - it will show request status from Approved, Draft, Pending and Rejected. Statuses should be denoted with following colors too: - Approved – Turquoise

	Draft – Amber Pending – Green Rejected – Red 7.4 C&F – it will show C & F name 7.5 Stockist – it will show Stockist name 7.6 Chemist – it will show Chemist name 7.7 Actions – it will show actions based on request status like: Modify – On draft requests Submit Claims – On Approved requests 7.8 Create New Request 8. On the click of Submit Claims, user will be re-directed to submit claim or select invoice screen. 9. User can view list of products requested under CN or ZHO request. 10. User can click on Select Invoice button against each product. 11. Application will fetch the invoices from SAP HANA system. 12. User will be able to view list of invoices. 13. User will be allowed to select single or multiple invoices against each product, considering the same product was supplied against the specified invoice. Note: User cannot select rows with different invoice numbers – when one invoice number is selected, all the rows with a different invoice number should become locked. 14. After selecting the invoice(s), user can click on Proceed button, to get redirected on provide invoice details. 15. User can also be able to cancel the request by clicking on Cancel button. 16. If user clicks on Cancel button, request will be canceled and user will be re-directed to CN/ZHO dashboard 17. On Provide Invoice Details page, user can see invoice details for each Product as per his/her selection. 18. User can also edit the invoices selection by clicking on ‘Edit Invoice Selection’ button before moving to the next step for each product. 19. User needs to provide the supply details as given in the Supply Bill along with following details: 19.1 Supply Qty – will allow to enter numbers 19.2 Bonus – will allow to enter numbers 19.3 Bill No. – will allow to enter numbers 19.4 Bill Date – will open a calendar 19.5 Automated checks: • Supply qty + Bonus <= Allowed qty • Bonus % <= approved Bonus % for that product under CN or ZHO order • Bill date should be on or after Invoice date • Bill date should be on or before present date 19.1 In case of any discrepancy, an error message will be shown to user and user will not be allowed to proceed until correct details have been entered. 19.2 Error message would be: 20. Done button should remain disabled until user fills all the required details. after filling all the details Done button should enable. User should click on
--	---

	Done button. 21. After clicking on Done button, user will be re-directed to upload bill copy page. 22. User will be able to view unique bill number(s) which was entered in previous page by user. 23. User can click on upload icon, to upload bill for each bill number. 24. User can also click on Back icon to go back on previous page till provide invoice details or dashboard. 25. After clicking on Done button, a pop up will open in which user can add remarks in text field which will be shown to Mankind hierarchy along with CN or ZHO request. 26. User can also be able to save claim for later by clicking on save for later button which will save as draft and can be modified later. Same claim will be shown in MR CN and ZHO dashboard under draft status. Also, "Modify" option will be shown as an action. 27. User or MR will be able to Modify the all the details which are required to submit the claim. 28. User can click on Send to FLM button as well to send the claim to Manager for an approval. 29. Once request has been approved from respective manager/team, it will be sent to subsequent manager or team for approval as per Mankind hierarchy (SLM→TLM→CN team). MR will be notified on each and subsequent approval and rejection. 30. User can review remarks as well provided by different managers or teams against each submitted claims while approving or rejecting. 31. The use case ends.
Acceptance Criteria	1. There should be a button for Submit Claims on created requests screen. It should be clickable. It should re-direct the user to provide invoice details page. 2. There should be a button to select invoice against each product. It should be clickable. It should re-direct the user to select invoices page. 3. There should be a Done button. it should remain disabled until user fills /selects required details for each product, after provided required details for each product, done button should enable. User should be able to click on Done button. 4. Application should be able to fetch the invoice details from SAP HANA system. 5. There should be list invoices along with check box on each invoice. It should be selectable. User should be able to select single or multiple invoices against each product. 6. User shouldn't be allowed to select/unselect multiple rows with different invoice numbers. When one invoice number is selected, all the rows with a different invoice number should be disabled to select. 7. There should be two buttons Proceed and Cancel. Those should be clickable. Proceed should take the customer to next page and cancel should abandon the request and re-direct the user to created requests page or dashboard. 8. There should be text boxes for following components for each product:

	8.9 Supply Qty – will allow to enter numbers 8.10 Bonus – will allow to enter numbers 8.11 Bill No. – will allow to enter numbers 8.12 Bill Date – will open a calendar 8.13 Those text fields should be clickable. 8.14 User should be allowed to fill values in it. 8.15 Validations should be: ▪ Supply qty + Bonus <= Allowed qty ▪ Bonus % <= approved Bonus % for that product under CN or ZHO order ▪ Bill date should be on or after Invoice date ▪ Bill date should be on or before present date 8.16 Error message should be shown, If the user enters an incorrect value above mentioned fields. 9. There should be a button for Edit invoice selection. It should be clickable. It should re-direct the user to invoice selection page and allow to change his/her selections. 10. There should be a Done button. it should remain disabled until user fills /selects required details for each product, after provided required details for each product, done button should enable. User should be able to click on Done button. 11. There should be an upload icon. It should be clickable. User should be able to upload bill for each bill number. 12. User should be able allowed to upload only PDF, JPG and PNG format files. 13. User should be allowed to upload maximum 10 MB file. 14. There should be a Done button. it should remain disabled until user fills /selects required details for each product, after provided required details for each product, done button should enable. User should be able to click on Done button. 15. User should be able to click on text box and enter the remarks. 16. User should be able to click on following buttons: 16.1. Save for later Button – to save the application as draft and can be modified later 16.2. Send to SLM for Approval Button – to submit the claim and send it to SLM for approval 17. User should be able to click on Modify button from CN and ZHO dashboard. 18. User and MR should be allowed to modify all the required details for claim submission. 19. A Popup will be shown on saving the application: “Thanks for submitting, your claim request has been saved as draft” 20. A Popup will be shown on sending it to FLM for approval: “Thanks for submitting, your claim request has been sent for approval to SLM”
Frequency	Every time, when user want to submit claims for CN/ZHO request.

9.4.7 SUMMARY

Description: - This screen will help user to view summary of CN and ZHO requests on which Credit note or ZHO number has been generated by SAP. User will also be able view data by filters of time period (from/to date selection) and drop-down selections of MR & Stockist. User will have an option to view CN and ZHO requests segregated on the basis of total orders, sales values and Average extra discount which can be further segregated by Doctor, Stockist and product wise.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1	Summary	Tab	On click, can view or re-direct to summary page
2	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.
3	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
4	MR	Dropdown	Clickable, shows assigned list of MR's and allows to select multiple MR
5	Stockist	Dropdown	Clickable, shows Stockist and allows to select single value
6	Go	Button	To apply the filters and update the summary details

7. Total Order tile			
7.1	Total Order number	Read only	Autofill, shows total no. of orders of CN and ZHO

12.3.3	AVG. Extra Discount	Read only	Autofill, shows average %age discount of ZHO orders Product wise

Use case:

Use case ID	UC-CN/ZHO -12
Use case	Summary

Priority	High
Actor(s)	FLM
Description	From this screen, user will be able to view summary of CN and ZHO requests on which Credit note or ZHO number has been generated by SAP. User will also be able view data by filters of time period (from/to date selection) and drop-down selections of MR & Stockist. User will also be able to view CN and ZHO requests segregated on the basis of total orders sales values and Average extra discount which can be further segregated by Doctor, Stockist and product wise.
Preconditions	This use case starts when user wants view summary of CN, ZHO and Total orders along with Doctor, stickist and product wise. User must be logged in. User must also have an access of admin under superman app. User must have clicked on Summary tab from CN/ZHO dashboard.
Post conditions	The user will able to view summary of CN, ZHO and Total orders along with Doctor support and potential. User will also be able to filter data on the basis of time duration selection and dropdown selections of MR and Stockist.
Basic flow of events	1. User will login in the application 2. User will click on the "Admin" tab from left panel. 3. User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard: a. Approve Requests – Shows Credit Note and ZHO request tab separately b. Created Requests – Shows Credit Note and ZHO request tab separately c. Summary d. Tab Filter – To filter requests based on All, Prior approval (application pending for FLM approval), Claim submission approval (claim pending for FLM approval), Approved (applications and claims) e. Claim no. – to search request via claim no. f. Select MR – to filter request on the basis of selected single MR from drop down g. Claim no. – Shows claim number h. Date - shows date of i. Stockist j. Station k. Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: Application Approved by SL, TL, PMT, FC or CN – Turquoise Claim Approved by SL, TL or CN – Turquoise

	Prior Approval Pending – Amber Claim Approval Pending – Amber Prior Approval Pending by SL, TL, PMT, FC – Amber Claim Approval Pending by SL, TL, CN – Amber Application Rejected by SL, TL, PMT or FC – Red Claim Rejected by SL, TL or CN – Red l. Sales Value (in RS.) of order (invoice value after discount) m. Actions – it will show actions based on request status like: Check application – On open approval requests for CN and ZHO application Check claim – On open approval request for claim submitted by MR's Review – On Approved requests - On the click on Summary tab, user will be re-directed to summary page - User can filter the summary by selecting time period (from/to date). - User can also filter the data on the basis multiple MR selections from list of assigned MR's. - User can also filter the data on the basis of single Stockist selection. - User can click Go button to apply the filters. - On the click of Go button, values of components showing under summary page will be updated with applied filters. - User will be able to view summary of following components on this page: 12.1 Total order tile: 12.1.1 Total Order number – Will show total of CN and ZHO orders 12.1.2 Total Sales Value (in RS) – Will show total sales value of Pool in RS 12.1.3 Sales Value (in RS) – will show total sales on CN/ZHO orders 12.1.4 GST (in Rs) – Will show total GST of CN and ZHO orders 12.1.5 Average Extra Discount – Will show total of average %age discount claimed under CN and ZHO orders 12.2 Credit Note orders tile: 12.2.1 Credit Note Order number – Will show total of CN orders only 12.2.2 %age Contribution of CN to Total sales – Will show contribution of CN in %age to total sales 12.2.3 Sales Value (in RS) – Will show total sales value of CN orders only in RS. (invoice value after discount) 12.2.4 GST (in RS) – Will show total GST of CN orders only 12.2.5 Average Extra Discount – Will show total of average %age discount claimed under CN orders only 12.3 ZHO Orders tile: 12.3.1 ZHO Order number – Will show total of CN orders only 12.3.2 Sales Value (in RS) – Will show total sales value of ZHO orders only in RS. (invoice value after discount) 12.3.3 GST (in RS) – Will show total GST of ZHO orders only 12.3.4 Average Extra Discount – Will show total of average %age discount claimed under ZHO orders only 12.4 Doctors wise: 12.4.1 Doctor Name – will show Doctor name and image 12.4.2 Support – Will show average support of 3 months by Doctor in
--	---

	terms of selling Mankind medicines in value 12.4.3 Potential – will show potential of Doctor in value in which DR can help selling Mankind Medicines 12.4.4 Credit Note: 12.4.4.1 Total Orders – Will show total no. of CN orders Doctor wise 12.4.4.2 Sales Value – Will shows sales value of CN orders Doctor wise (invoice value after discount) 12.4.4.3 AVG. Extra Discount – Will show average %age discount of CN orders Doctor wise 12.4.5 ZHO 12.4.5.1 Total Orders – Will show total no. of ZHO orders Doctor wise 12.4.5.2 Sales Value – Will shows sales value of ZHO orders Doctor wise (invoice value after discount) 12.4.5.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Doctor wise 12.5 Stockist Wise 12.5.1 8.5.1 Stockist Name – will show Stockist name without image 12.5.2 Credit Note: 12.5.2.1 Total Orders – Will show total no. of CN orders Stockist wise 12.5.2.2 Sales Value – Will shows sales value of CN orders Stockist wise (invoice value after discount) 12.5.2.3 AVG. Extra Discount – Will show average %age discount of CN orders Stockist wise 12.5.3 ZHO 12.5.3.1 Total Orders – Will show total no. of ZHO orders Stockist wise 12.5.3.2 Sales Value – Will shows sales value of ZHO orders Stockist wise 12.5.3.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Stockist wise 12.6 Product Wise 12.6.1 Product Name – will show Product name without image 12.6.2 Credit Note: 12.6.2.1 Total Orders – Will show total no. of CN orders Product wise 12.6.2.2 Sales Value – Will shows sales value of CN orders Product wise (invoice value after discount) 12.6.2.3 AVG. Extra Discount – Will show average %age discount of CN orders Product wise 12.6.3 ZHO 12.6.3.1 Total Orders – Will show total no. of ZHO orders Product wise 12.6.3.2 Sales Value – Will shows sales value of ZHO orders Product wise (invoice value after discount) 12.6.3.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Product wise
--	--

	13. The use case ends. Note: Details for Credit note will be populated on this page after CN has been generated by SAP. Details for ZHO will be populated after supply bill has been approved by CN team on this page. Amount for both will be procured from SAP.
Acceptance Criteria	- There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. - There should be dropdown for MR selection. It should be clickable. User should be allowed to select multiple MR's. - There should be dropdown for Stockist selection. It should be clickable. User should be allowed to select single Stockist - Search - User will be able to search the claims based on Claim number. - User will be able to click search bar. - User will be able to input in the search bar. - Search will be applied automatically and search results will be displayed after inputting 3 numbers. - On inputting any number in search bar, a cross icon should be displayed to user in search bar. - User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. - On click cross icon, search input will be reset and data in list will be displayed accordingly. - There should be a Go button and it should be clickable. On the click of Go button filters should be applied and data should be updated or shown on the basis of filters. - There should be 3 tabs for Doctors, Stockist and Product. Each tab should show the data on the basis of respective tab of CN and ZHO orders.
Frequency	Every time, when user want to view summary of CN and ZHO orders.

9.5 SLM MANAGER FUNCTIONALITY

9.5.1 CREDIT NOTE AND ZHO DASHBOARD

Description: - This screen will help the SLM to view all/open CN and ZHO requests separately for SLM approval which was approved by FLM and created CN and ZHO requests by FLM (on behalf of MR), along with its status and required actions. User will also have an option to view summary of CN and ZHO requests on the basis of logged in SLM.

Prototype:
Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Requests	Tab	Shows along with number of open requests. Re-directs to ZHO requests page
2	Summary	Tab	Re-directs to Summary page
3	Credit Note Requests	Tab	Re-directs to CN requests page
4	ZHO Requests	Tab	Re-directs to ZHO requests page
5	Tab Filter	Tabs	Clickable to filter data (All, Prior approval, claim submission, Approved)
6	Search	Text box	Search by Claim Number. Search will be applied automatically and search results will be displayed after inputting 3 characters
7	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.
8	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
9	Select MR	Drop Down	Shows all the MR's, allows to select single MR from drop down
10	Go	Button	To apply the filters

SRS/0.2

Software Requirement Specification

11	Claim No.	Read Only	Autofill
12	Date	Read Only	Autofill, shows date of
13	Stockist	Read Only	Autofill
14	Station	Read Only	Autofill
15	Status	Read Only	Autofill, Prior approval pending, claim approval pending, claim approval by SL, TL, PMT, FC, CN (manager or team)
16	Sales value (in RS.)	Read Only	Autofill, shows sales Value (in Rs) for that order (invoice value after discount)
17	Actions	Button	Shows required respective actions for request, To re-direct to perform actions like Check Application (for CN/ZHO application approvals)/ Check Claim (for claims submission approval) / Review (for approved)
18	Back	Icon	Clickable, to re-direct user to previous page

Use Case:-

Use case ID	UC-CN/ZHO -14
Use case	Credit Note and ZHO Dashboard
Priority	High

Actor(s)	SLM
Description	This dashboard will help the SLM to view all/open CN and ZHO requests separately for SLM approval which was approved by FLM and created CN and ZHO requests by FLM (on behalf of MR), along with its status and required actions. User will also be able to view summary of CN and ZHO requests.
Preconditions	This use case starts when user wants to view CN or ZHO all/open approval requests for logged in SLM which was approved by assigned FLM's. User must be logged in. User must have access to Credit Note and ZHO module.
Post conditions	• The user will able to view all/open CN and ZHO requests for SLM approval along with its status and required actions. • User will be able to filter requests. • User will be able to search requests based on claim no. • User will be able to re-direct on summary page. • User will be able to re-direct on check application, check claims page to approve application or claim. User can also be able to re-direct to review page.
Basic flow of events	1. User will login in the application 2. User will click on the "Admin" tab from left panel. 3. User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard: a. Approve Requests – Shows Credit Note and ZHO request tab separately b. Created Requests – Shows Credit Note and ZHO request tab separately c. Summary d. Tab Filter – To filter requests based on All, Prior approval (application pending for FLM approval), Claim submission approval (claim pending for FLM approval), Approved (applications and claims) e. Claim no. – to search request via claim no. f. Select MR – to filter request on the basis of selected single MR from drop down g. Claim no. – Shows claim number h. Date - shows date of i. Stockist j. Station k. Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: Application Approved by SL, TL, PMT, FC or CN – Turquoise Claim Approved by SL, TL or CN – Turquoise Prior Approval Pending – Amber

	Claim Approval Pending – Amber Prior Approval Pending by SL, TL, PMT, FC – Amber Claim Approval Pending by SL, TL, CN – Amber Application Rejected by SL, TL, PMT or FC – Red Claim Rejected by SL, TL or CN – Red l. Sales Value (in RS.) of order (invoice value after discount) m. Actions – it will show actions based on request status like: Check application – On open approval requests for CN and ZHO application Check claim – On open approval request for claim submitted by MR's or FLM Review – On Approved requests - User can click on Approve Requests tab to redirect view all the CN and ZHO request separately. By default, user will land on this page after the selection of Credit Note and ZHO from previous screen. - User can click on Credit note Requests to redirect on CN requests page where user can view all CN requests from all assigned FLM's. - User can click on ZHO Requests to redirect on ZHO request page where user can view all ZHO requests from all assigned FLM's. - User can view number of open or to be worked upon requests next to Approve Requests tab. - User can filter the CN and ZHO requests based on All, Prior approval, claims submission and Approved. - User can view all approved credit note/ZHO requests, on the click of approved tab. - User can view all pending application approval requests, on the click of prior approval tab. - User can view all pending claim approval requests, on the click of claims submission tab. - User can filter the data by selecting time period (from/to date). - User can also filter the requests by selecting one of the MR's from assigned MR's drop down. - User can click on Go button, to apply the filters. - User can search the request by claim no. as well. - User can click on Check Application, to get re-directed on approve application page. - User can click on Check Claim, to get re-directed on approve claim page. - User can click on Review button, to get redirected to review details page for approved requests. From where user will be able to download request review page details as well in PDF format by clicking on download icon. - User can also click on Summary tab to get redirected on Summary page. - The use case ends.
Acceptance Criteria	- User should be able to view CN and ZHO dashboard - User should be able to click on Approve Requests. - User should be able to click on Credit Note requests under approve requests. - User should be able to click on ZHO requests under approve requests - There should be clickable All, Prior Approval, claims submission and Approved tabs to filter the CN or ZHO requests. On the click of each tab

	requests should be filtered. 6. There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. 7. There should be MR drop down. It should be clickable. User will be allowed to select single MR from assigned MR's to FLM/SLM. 8. Search - User will be able to search the claims based on Claim number. 8.1 User will be able to click search bar. 8.2 User will be able to input in the search bar. 8.3 Search will be applied automatically and search results will be displayed after inputting 3 numbers. 8.4 On inputting any number in search bar, a cross icon should be displayed to user in search bar. 8.5 User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. 8.6 On click cross icon, search input will be reset and data in list will be displayed accordingly. 9. There should be a Go button and it should be clickable. On the click of Go button, filters should be applied and data should be updated or shown on the basis respective filters. 10. User should be able to click on Summary tab. 11. User should be able to click on Check application, check claim and review buttons to get redirected on respective page. 12. On Review page, there should be a Download icon. It should be clickable and download the review page details in PDF format.
Frequency	Every time, when user wants view all/open CN and ZHO requests for SLM approval and take respective actions.

9.5.2 APPROVE/REJECT CN/ZHO REQUESTS

Description: - This screen will allow user to Accept/Reject the CN and ZHO requests approved/raised by FLM. After approval of SLM, each request will be sent for approval as per Mankind hierarchy which is {TLM→FC→PMT (if required)}. Once request has been approved from SLM, it will be sent to subsequent manager (TLM) for approval. Before the TLM approval, request must be approved by SLM. User will have an option to write the remarks for acceptance/rejection. In case of acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Application	Button	Clickable, to approve the application
2	Reject	Button	Clickable, to reject the application
3 Approval Status			
3.1	Prior approval	Read Only	Auto fill, shows application approval status of each manager and team
3.2	Claims Approval	Read Only	Auto fill, shows claim approval status of each manager and team
4 Request Details			
4.1	Created BY	Read Only	Auto fill, shows name of MR who created the request
4.2	Claim No.	Read Only	Auto fill, shows Claim number
4.3	Date	Read Only	Auto fill, shows date of
4.4	C & F	Read Only	Auto fill, shows C & F name selected by MR while creating request
4.5	Stockist	Read Only	Autofill, shows Stockist name selected by MR while creating request
4.6	Doctor	Read Only	Autofill, shows Doctor name selected by MR while creating request

4.7	Speciality	Read Only	Autofill, shows speciality of Doctor selected by MR while creating request
4.8	Region	Read Only	Autofill, shows region of Doctor belongs to
4.9	Doctor's type	Read Only	Autofill, shows type of Doctor selected by MR while creating request
4.10	Chemist attached to Doctor	Read Only	Autofill, shows Chemist attached to Doctor selected by MR while creating request
4.11	Doctor's prescription	Read Only	Autofill, allows to download Doctor prescription, uploaded by MR while creating request
4.12	Doctor Potential	Read Only	Autofill, Doctor potential in RS (average of 3 months) Source Superman app or SAP
4.13	Doctor Support	Read Only	Autofill, Doctor Support in RS (average of 3 months) Source Superman app or SAP
4.14	Requests raised this quarter	Read Only	Autofill, show number of requests raised for Doctor in this quarter, including Pending, Approved, Rejected
4.15	Bonus amount raised this quarter	Read Only	Autofill, bonus amount in RS on the basis of request raised for Doctor in this quarter, Source Superman app or SAP
4.16	Request raised this quarter by Stockist	Read Only	Autofill, request raised for specific Stockist for same Doctor in this quarter, Source Superman

			app or SAP
5 Product Details Mankind			
5.1	Selected products	Read Only	Autofill, shows list of products for which request has been created
5.2	Required extra	Read Only	Autofill, shows extra %age discount requested in request for specific product
5.3	Monthly Consumption	Read Only	Autofill, shows number of monthly consumptions of specific product
5.4	Bonus	Read Only	Autofill, shows bonus value
5.5	Company Name	-	Will be blank for Mankind products always
6 Product Details Competitor			
6.1	Selected products	Read Only	Autofill, shows list of competitor product against each product if added by MR while creating request
6.2	Required extra	Read Only	Autofill, shows extra %age discount filled by MR for competitor product
6.3	Monthly Consumption	Read Only	Autofill, shows number of monthly consumptions filled by MR for competitor product
6.4	Bonus	Read Only	Autofill, shows bonus value filled by MR for competitor product
6.5	Company Name	Read Only	Autofill, shows company name of product filled by MR for competitor product

7 Remarks			
7.1	MR's Remarks	Read Only	Autofill, shows Remarks entered by MR before sending the request for approval
7.2	FLM's Remarks	Read Only	Autofill, shows Remarks entered by FLM before sending the request for approval
7.3	Enter your remarks	Text box	Allows SLM to enter his/her remarks before approval

Use Case:-

Use case ID	UC-CN/ZHO -15
Use case	Approve/Reject CN and ZHO requests
Priority	High
Actor(s)	SLM
Description	From this screen, user will be able to Accept/Reject the CN and ZHO requests raised/approved by FLM(s). After approval of SLM, each request will be sent for approval as per Mankind hierarchy which is {TLM→FC→PMT (if required)}. Once request has been approved from SLM, it will be sent to subsequent manager (TLM) for approval. Before the SLM approval, request must be approved by FLM. User will also be able to write the remarks for acceptance/rejection. In case of acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.
Preconditions	This use case starts when user wants to approve/reject CN or ZHO open requests for logged in SLM approval which are raised/approved by assigned FLM(s). User must be logged in. User must have access to Credit Note and ZHO module.
Post conditions	- The user will able to view open CN and ZHO requests for SLM approval along with its status and required actions. - User will be able to view details like approval status, request details, product details and remarks entered by MR and FLM. - User will be able to approve/reject open CN and ZHO requests for SLM approval.

	User will also be able to enter remarks before approve/reject the request.
Basic flow of events	- User will login in the application - User will click on the "Admin" tab from left panel. - User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. - User will be redirected to CN and ZHO dashboard - User will be able to view the following information in the dashboard: - Approve Requests – Shows Credit Note and ZHO request tab separately - Summary - Tab Filter – To filter requests based on All, Prior approval (application pending for SLM approval), Claim submission approval (claim pending for SLM approval), Approved (applications and claims) - Claim no. – to search request via claim no. - Select MR – to filter request on the basis of selected single MR from drop down - Claim no. – Shows claim number - Date - shows date of - Stockist - Station - Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: - Application Approved by SL, TL, PMT, FC or CN – Turquoise - Claim Approved by SL, TL or CN – Turquoise - Prior Approval Pending – Amber - Claim Approval Pending – Amber - Prior Approval Pending by SL, TL, PMT, FC – Amber - Claim Approval Pending by SL, TL, CN – Amber - Application Rejected by SL, TL, PMT or FC – Red - Claim Rejected by SL, TL or CN – Red - Sales Value (in RS.) of order (invoice value after discount) - Actions – it will show actions based on request status like: - Check application – On open approval requests for CN and ZHO application - Check claim – On open approval request for claim submitted by MR's or FLM - Review – On Approved requests - User Clicks on Approve Requests tab to get redirected and view all the CN and ZHO request separately available for SLM approval. - User can click on Credit note Requests to redirect on CN requests page where user can view all CN requests from all assigned FLM's. - User can click on ZHO Requests to redirect on ZHO request page where user can view all ZHO requests from all assigned FLM's.

	7. User Clicks on Check Application, to get re-directed on approve application page. 8. User will be able to view details like approval status, request details, product details and remarks. 8.1 Approval status 8.1.1 Prior approval – will show application approval status of each manager and team. 8.2 Approval status 8.1.2 Claims approval – will show Claim approval status of each manager and team. 8.2 Request Details 8.2.1 Created By – will show name of MR who created the request 8.2.2 Claim No. – will show Claim no. 8.2.3 Date – will show Date of 8.2.4 C & F – will show C & F name 8.2.5 Stockist – will show Stockist name 8.2.6 Doctor – will show Doctor name 8.2.7 Specialty – will show Doctor specialty 8.2.8 Region – will show Doctor region 8.2.9 Doctor's type – will show type of Doctor selected by MR while creating request 8.2.10 Chemist attached to Doctor – will show Chemist attached to Doctor selected by MR while creating request 8.2.11 Doctor's prescription – will download Doctor prescription, uploaded by MR while creating request 8.2.12 Doctor Potential – will show Doctor potential in RS (average of 3 months) Source Superman app or SAP 8.2.13 Doctor Support – will show Doctor Support in RS (average of 3 months) Source Superman app or SAP 8.2.14 Requests raised this quarter – will show number of requests raised for Doctor in this quarter, including Pending, Approved, Rejected 8.2.15 Bonus amount raised this quarter – will show bonus amount in RS on the basis of request raised for Doctor in this quarter, Source Superman app or SAP 8.2.16 Request raised this quarter by Stockist – will show request raised for specific Stockist for same Doctor in this quarter, Source Superman app or SAP 8.3 Product details of Mankind and Competitor 8.3.1 Selected products – will show list of products for which request has been created 8.3.2 Required extra – will show extra %age discount requested in request for specific product 8.3.3 Monthly Consumption – will show number of monthly consumptions of specific product 8.3.4 Bonus – will show bonus value 8.3.5 Company Name – Will be blank for Mankind products always 8.3.1 Selected products (competitor) – will list of competitor product against each product if added by MR while creating request
--	--

	8.3.2 Required extra (competitor) – will show extra %age discount filled by MR for competitor product 8.3.3 Monthly Consumption (competitor) – will show number of monthly consumptions filled by MR for competitor product 8.3.4 Bonus (competitor) – will show bonus value filled by MR for competitor product 8.3.5 Company Name (competitor) – will show company name of product filled by MR for competitor product 8.4 Remarks 8.4.1 MR's Remarks – will show MR's remarks 8.4.2 FLM's Remarks – will show FLM's remarks 8.4.3 Remarks – will allow user to enter remarks in text box 9. User can also be able to download Doctor's prescription, by clicking on file name showing below Doctor's prescription field under request details section which was uploaded by MR. 10. User can enter remarks in text box before approving and rejecting the request. MR and FLM would also be able to view SLM remarks. 11. User can view remarks of MR and FLM too. 12. User can click on Approve button, to approve the application. Once approved by SLM, request will be sent for TLM approval and MR will be notified. 13. User can click on Reject button, to reject the application. Once rejected by SLM, request will not be sent for TLM approval. In case of Rejection only, below managers shall also be notified along with MR. 14. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. User should be able to click on Check application button to get redirected on application approval page. 6. User should be able to view Doctor's prescription file name. it should be clickable. If user clicks on file name, it should be downloaded. 7. There should be an Approve Application button. It should be clickable. On click of approve application button, request should be approved and sent to TLM for approval. MR should be notified. 8. There should be a Reject button. It should be clickable. On click of reject button, request should be rejected and will not be sent to TLM for approval. In case of Rejection only, below managers shall also be notified along with MR. 9. There should a text box for user to enter remarks. It should be clickable. Remarks would be mandatory for rejection. Note: Vacant Check If an FLM/SLM is vacant, and no action is taken for 48 hours, then it will be forwarded to the next level and approval status show Vacant (no action taken). (E.g. if FLM is vacant, then it will be escalated to SLM. If SLM is vacant, it will be escalated to TLM)

Frequency	Every time, when user wants view and approve/reject all open CN and ZHO requests for SLM approval.
------------------	--

9.5.3 APPROVE/REJECT CLAIMS

Description: - This screen will allow user to Accept/Reject the claims submitted/approved by FLM against each CN or ZHO request. After approval of SLM, each claim request will be sent for approval as per Mankind hierarchy which is {TLM→CN}. Once claim request has been approved from SLM, it will be sent to subsequent manager (TLM) for approval. Before the SLM approval, request must be approved by FLM. User will have an option to write the remarks for acceptance/rejection. In case of acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Claim	Button	Clickable, to approve the Claim
2	Reject	Button	Clickable, to reject the Claim
3 Approval Status			
3.1	Prior approval	Read Only	Auto fill, shows application approval status of each manager and team
3.2	Claims Approval	Read Only	Auto fill, shows claim approval status of each manager and team
4 Request Details			
4.1	Created By	Read Only	Auto fill, shows name of MR who

			created the request
4.2	Claim No.	Read Only	Auto fill, shows Claim no.
4.3	Date	Read Only	Auto fill, shows date of
4.4	C & F	Read Only	Auto fill, shows C & F name selected by MR while creating request
4.5	Stockist	Read Only	Autofill, shows Stockist name selected by MR while creating request
4.6	Doctor	Read Only	Autofill, shows Doctor name selected by MR while creating request
4.7	Speciality	Read Only	Autofill, shows speciality of Doctor selected by MR while creating request
4.8	Region	Read Only	Autofill, shows region of Doctor belongs to
4.9	Doctor's type	Read Only	Autofill, shows type of Doctor selected by MR while creating request
4.10	Chemist attached to Doctor	Read Only	Autofill, shows Chemist attached to Doctor selected by MR while creating request
4.11	Doctor's prescription	Read Only	Autofill, allows to download Doctor prescription, uploaded by MR while creating request
5 Product Details (for each product of order)			
5.1	Product Name	Read Only	Autofill, shows product name
5.2	Invoice No.	Read Only	Autofill, shows invoice number

SRS/0.2
Software Requirement Specification

5.3	Batch	Read Only	Autofill, shows batch name
5.4	Date	Read Only	Autofill, shows date of
5.5	MRP	Read Only	Autofill, shows product MRP
5.6	PTR	Read Only	Autofill, shows price of product to retailer
5.7	PTS	Read Only	Autofill, shows price of product to Stockist
5.8	Supply Qty	Read Only	Autofill, shows supplied quantity of product under order
5.9	Bonus	Read Only	Autofill, shows bonus value
5.10	IN%	Read Only	Autofill, shows IN %age
5.11	Total Qty.	Read Only	Autofill, shows total quantity of order
5.12	Cons	Read Only	Autofill, shows cons
5.13	Allowed Qty	Read Only	Autofill, shows allowed quantity of product
5.14	Bill No.	Read Only	Autofill, shows bill no.
5.15	Bill Date	Read Only	Autofill, shows bill date
6 Supply Bills			
6.1	Bill no.	Read Only	Autofill, shows bill no.
6.2	Bill Date	Read Only	Autofill, shows bill date
6.3	Bill Copy	Button	Clickable, shows bill copy(s) which was uploaded by MR
7 Remarks			
7.1	MR's Remarks	Read Only	Autofill, shows Remarks entered by MR before sending the claim

			request for approval
7.2	FLM's Remarks	Read Only	Autofill, shows Remarks entered by FLM before sending the claim request for approval
7.3	Enter your remarks	Text box	Allows FLM to enter his/her remarks before approval

Use Case:-

Use case ID	UC-CN/ZHO -16
Use case	Approve/Reject Claims
Priority	High
Actor(s)	SLM
Description	From this screen, user will be able to Accept/Reject the claims submitted/approved by FLM against each CN or ZHO request. After approval of SLM, each claim request will be sent for approval as per Mankind hierarchy which is {TLM→CN}. Once claim request has been approved from SLM, it will be sent to subsequent manager (TLM) for approval. Before the SLM approval, request must be approved by FLM. User will have an option to write the remarks for acceptance/rejection. In case acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.
Preconditions	This use case starts when user wants to approve/reject open claims for logged in SLM approval submitted/approved by assigned FLM's. User want to view and download supply bills. User must be logged in. User must have access to Credit Note and ZHO module.
Post conditions	- The user will able to view open claims for SLM approval along with its status and required actions. - User will be able to view details like approval status, request details, product details, supply details and remarks entered by MR and FLM. - User will also be able to view and download supply bills for each claim which was uploaded by MR's. - User will be able to approve/reject open claims for SLM approval. - User will also be able to enter remarks before approve/reject the claim.
Basic flow of	1. User will login in the application

events	2. User will click on the “Admin’ tab from left panel. 3. User will click on the “Credit Note and ZHO’ option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard: a. Approve Requests – Shows Credit Note and ZHO request tab separately b. Summary c. Tab Filter – To filter requests based on All, Prior approval (application pending for SLM approval), Claim submission approval (claim pending for SLM approval), Approved (applications and claims) d. Claim no. – to search request via claim no. e. Select MR – to filter request on the basis of selected single MR from drop down f. Claim no. – Shows claim number g. Date - shows date of h. Stockist i. Station j. Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency’s and rejections. Statuses should be denoted with following colors too: Application Approved by SL, TL, PMT, FC or CN – Turquoise Claim Approved by SL, TL or CN – Turquoise Prior Approval Pending – Amber Claim Approval Pending – Amber Prior Approval Pending by SL, TL, PMT, FC – Amber Claim Approval Pending by SL, TL, CN – Amber Application Rejected by SL, TL, PMT or FC – Red Claim Rejected by SL, TL or CN – Red k. Sales Value (in RS.) of order (invoice value after discount) l. Actions – it will show actions based on request status like: Check application – On open approval requests for CN and ZHO application Check claim – On open approval request for claim submitted by MR’s or FLM Review – On Approved requests 6. User Clicks on Approve Requests tab to get redirected and view all the CN and ZHO request separately. a. User can click on Credit note Requests to redirect on CN requests page where user can view all CN requests from all assigned FLM’s. b. User can click on ZHO Requests to redirect on ZHO request page where user can view all ZHO requests from all assigned FLM’s 7. User Clicks on Check Claim, to get re-directed on approve claim page. 8. User will be able to view details like approval status, request details, product details, Supply bills and remarks.
---------------	--

	8.1 Approval status 8.1.1 Prior approval – will show claim approval status of each manager and team. 8.1.2 Claims approval – will show claim approval status of each manager and team. 8.2 Request Details 8.2.1 Created By – will show name of MR who created the request 8.2.2 Claim No. – will show Claim no. 8.2.3 Date – will show Date of 8.2.4 C & F – will show C & F name 8.2.5 Stockist – will show Stockist name 8.2.6 Doctor – will show Doctor name 8.2.7 Specialty – will show Doctor specialty 8.2.8 Region – will show Doctor region 8.2.9 Doctor's type – will show type of Doctor selected by MR while creating request 8.2.10 Chemist attached to Doctor – will show Chemist attached to Doctor selected by MR while creating request 8.3 Product details of each product 8.3.1 Product Name – will show product name 8.3.2 Invoice No. – will show invoice number 8.3.3 Batch – will show batch name 8.3.4 Date – will show date of 8.3.5 MRP – will show product MRP 8.3.6 PTR – will show price of product to retailer 8.3.7 PTS – will show price of product to Stockist 8.3.8 Supply Qty – will show supplied quantity of product under order 8.3.9 Bonus – will show bonus value 8.3.10 IN% – will show IN %age 8.3.11 Total Qty. – will show total quantity of order 8.3.12 Cons – will show cons 8.3.13 Allowed Qty – will show allowed quantity of product 8.3.14 Bill No. – will show bill no. 8.3.15 Bill Date – will show bill date 8.4 Supply Bills 8.4.1 Bill No. – will show bill no. 8.4.2 Bill Date – will show bill date 8.4.2 Bill Copy – Clickable, will show bill copy(s) name and allow user to view download respective bill 8.4 Remarks 8.4.1 MR's Remarks – will show MR's remarks 8.4.2 FLM's Remarks – will show FLM's remarks 8.4.2 Remarks – will allow user to enter remarks in text box 9. User can also be able to download Doctor's prescription, by clicking on file name showing below Doctor's prescription field under request details section which was uploaded by MR or FLM. 10. User can also be able to view and download supply bill(s) uploaded by MR' s or FLM, by clicking on bill copy name showing below bill copy field under
--	--

	supply bills section which was uploaded by MR. 11. User will be able to enter remarks in text box before approving/rejecting the request. Those remarks will be shown to MR and Managers both. 12. User can click on Approve Claim button, to approve the claim. Once approved by SLM, claim will be sent to TLM for approval and MR will be notified. 13. User can click on Reject button, to reject the claim. Once rejected by SLM, request will not be sent for TLM approval. In case of Rejection only, below managers shall also be notified along with MR. 14. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. User should be able to click on Check Claim button to get redirected on claim approval page. 6. User should be able to view Doctor's prescription file name. it should be clickable. If user clicks on file name, it should be downloaded. 7. User should be able to view supply bill(s) file names. it should be clickable. If user clicks on file name, it should be viewable and downloaded too. 8. There should be an Approve Claim button. It should be clickable. On click of approve claim button, claim should be approved and sent to TLM for approval. MR also should be notified. 9. There should be a Reject button. It should be clickable. On click of reject button, claim should be rejected and will not be sent to TLM for approval. In case of Rejection only, below managers shall also be notified along with MR. 10. There should a text box for user to enter remarks. It should be clickable. Remarks would be mandatory for rejection. Note: Vacant Check If an FLM/SLM is vacant, and no action is taken for 48 hours, then it will be forwarded to the next level and approval status show Vacant (no action taken). (E.g. if FLM is vacant, then it will be escalated to SLM. If SLM is vacant, it will be escalated to TLM)
Frequency	Every time, when user wants view and approve/reject all open claims for SLM approval.

9.5.4 SUMMARY

Description: - This screen will help user to view summary of CN and ZHO requests on which Credit note or ZHO number has been generated by SAP. User will also be able view data by filters of time period (from/to date selection) and drop-down selections of MR & Stockist. User will have an option to view CN and ZHO requests segregated on the basis of total orders, sales values and Average extra discount which can be further segregated by Doctor, Stockist and product wise.

Prototype:
Data Elements:

S. No	Field Name	Field Type	Description
1	Summary	Tab	On click, can view or re-direct to summary page
2	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.
3	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
4	MR	Dropdown	Clickable, shows assigned list of MR's and allows to select multiple MR
5	Stockist	Dropdown	Clickable, shows Stockist and allows to select single value
6	Go	Button	To apply the filters and update the summary details
7. Total Order tile			
7.1	Total Order number	Read only	Autofill, shows total no. of orders of CN and ZHO
7.2	Total Sales Value (in RS)	Read only	Autofill, shows total sales value of Pool in RS
7.3	Sales Value (in	Read only	Autofill, shows total value of

	RS)		CN/ZHO orders in RS (invoice value after discount)

Details for ZHO will be populated after supply bill has been approved by CN team on this page. Amount for both will be procured from SAP.
Acceptance Criteria	- There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. - There should be dropdown for MR selection. It should be clickable. User should be allowed to select multiple MR's. - There should be dropdown for Stockist selection. It should be clickable. User should be allowed to select single Stockist - Search - User will be able to search the claims based on Claim number. - User will be able to click search bar.

SRS/0.2

Software Requirement Specification

	4.2. User will be able to input in the search bar. 4.3. Search will be applied automatically and search results will be displayed after inputting 3 numbers. 4.4. On inputting any number in search bar, a cross icon should be displayed to user in search bar. 4.5. User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. 4.6. On click cross icon, search input will be reset and data in list will be displayed accordingly. 5. There should be a Go button and it should be clickable. On the click of Go button filters should be applied and data should be updated or shown on the basis of filters. 6. There should be 3 tabs for Doctors, Stockist and Product. Each tab should show the data on the basis of respective tab for CN and ZHO orders.
Frequency	Every time, when user want to view summary of CN and ZHO orders.

9.6 TLM MANAGER FUNCTIONALITY

9.6.1 CREDIT NOTE AND ZHO DASHBOARD

Description: - This screen will help the TLM to view all/open CN and ZHO requests separately for TLM approval which was approved by SLM, along with its status and required actions. User will also have an option to view summary of CN and ZHO requests on the basis of logged in TLM.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Requests	Tab	Shows along with number of open requests. Re-directs to ZHO requests page

2	Summary	Tab	Re-directs to Summary page
3	Credit Note Requests	Tab	Re-directs to CN requests page
4	ZHO Requests	Tab	Re-directs to ZHO requests page
5	Tab Filter	Tabs	Clickable to filter data (All, Prior approval, claim submission, Approved)
6	Search	Text box	Search by Claim Number. Search will be applied automatically and search results will be displayed after inputting 3 characters
7	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.
8	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
9	Select MR	Drop Down	Shows all the MR's, allows to select single MR from drop down
10	Go	Button	To apply the filters
11	Claim No.	Read Only	Autofill
12	Date	Read Only	Autofill, shows date of
13	Stockist	Read Only	Autofill
14	Station	Read Only	Autofill
15	Status	Read Only	Autofill, Prior approval pending, claim approval pending, claim approval by SL, TL, PMT, FC, CN (manager or team)

SRS/0.2

Software Requirement Specification

16	Sales value (in RS.)	Read Only	Autofill, shows sales Value (in Rs) for that order (invoice value after discount)
17	Actions	Button	Shows required respective actions for request, To re-direct to perform actions like Check Application (for CN/ZHO application approvals)/ Check Claim (for claims submission approvals) / Review (for approved)
18	Back	Icon	Clickable, to re-direct user to previous page

Station j. Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency’s and rejections. Statuses should be denoted with following colors too: - Application Approved by SL, TL, PMT, FC or CN – Turquoise - Claim Approved by SL, TL or CN – Turquoise - Prior Approval Pending – Amber - Claim Approval Pending – Amber - Prior Approval Pending by SL, TL, PMT, FC – Amber - Claim Approval Pending by SL, TL, CN – Amber - Application Rejected by SL, TL, PMT or FC – Red - Claim Rejected by SL, TL or CN – Red k. Sales Value (in RS.) of order (invoice value after discount) l. Actions – it will show actions based on request status like: - Check application – On open approval requests for CN and ZHO application - Check claim – On open approval request for claim - Review – On Approved requests 6. User can click on Approve Requests tab to redirect view all the CN and ZHO request separately. By default, user will land on this page after the selection of Credit Note and ZHO from previous screen. a. User can click on Credit note Requests to redirect on CN requests page where user can view all CN requests from all assigned SLM’s. b. User can click on ZHO Requests to redirect on ZHO request page where user can view all ZHO requests from all assigned SLM’s. 7. User can view number of open or to be worked upon requests next to

	Approve Requests tab. 8. User can filter the CN and ZHO requests based on All, Prior approval, claims submission and Approved. 9. User can view all pending application approval requests, on the click of prior approval tab. 10. User can view all pending claim approval requests, on the click of claims submission tab. 11. User can view all approved credit note/ZHO requests, on the click of approved tab. 12. User can filter the data by selecting time period (from/to date). 13. User can also filter the requests by selecting one of the MR's from assigned MR's drop down. 14. User can click on Go button, to apply filters and requests will be filtered on the basis of filters. 15. User can search the request by claim no. as well. 16. User can click on Check Application, to get re-directed on approve application page. 17. User can click on Check Claim, to get re-directed on approve claim page. 16. User can click on Review button, to get redirected to review details page for approved requests. On click of Review button, a pop-up will be open where user can view order details. From where user will be able to download request review page details as well in PDF format by clicking on download icon. 18. User can also click on Summary tab to get redirected on Summary page. 19. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. There should be clickable All, Prior Approval, claims submission and Approved tabs to filter the CN or ZHO requests. On the click of each tab request should be filtered. 6. Search - User will be able to search the claims based on Claim number. 6.1. User will be able to click search bar. 6.2. User will be able to input in the search bar. 6.3. Search will be applied automatically and search results will be displayed after inputting 3 numbers. 6.4. On inputting any number in search bar, a cross icon should be displayed to user in search bar. 6.5. User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. 6.6. On click cross icon, search input will be reset and data in list will be displayed accordingly. 7. There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. 8. There should be MR drop down. It should be clickable. User will be allowed to select single MR from assigned MR's to FLM/SLM/TLM. 9. There should be a Go button and it should be clickable. On the click of Go

	button, filters should be applied and data should be updated or shown on the basis respective filters. 10. User should be able to click on Summary tab. 11. User should be able to click on Check application, check claim and review buttons to get redirected on respective page. 12. There should be a Review button and it should be clickable. On the click of review button, user should be re-directed to review pop-up. On Review page, there should be a Download icon. It should be clickable and download the review page details in PDF format.
Frequency	Every time, when user wants view all/open CN and ZHO requests for TLM approval and take respective actions.

9.6.2 APPROVE/REJECT CN/ZHO REQUESTS

Description: - This screen will allow user to Accept/Reject the CN and ZHO requests approved by SLM. After approval of TLM, each request will be sent for approval as per Mankind hierarchy which is {FC→PMT (if required)}. Once request has been approved from TLM, it will be sent to subsequent team (FC) for approval. Before the FC approval, request must be approved by TLM. User will have an option to write the remarks for acceptance/rejection. In case of acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Application	Button	Clickable, to approve the application
2	Reject	Button	Clickable, to reject the application
3 Approval Status			
3.1	Prior approval	Read Only	Auto fill, shows application approval status of each manager

			and team
3.2	Claims Approval	Read Only	Auto fill, shows claim approval status of each manager and team
4 Request Details			
4.1	Created BY	Read Only	Auto fill, shows name of MR who created the request
4.2	Claim No.	Read Only	Auto fill, shows Claim no.
4.3	Date	Read Only	Auto fill, shows date of
4.4	C & F	Read Only	Auto fill, shows C & F name selected by MR while creating request
4.5	Stockist	Read Only	Autofill, shows Stockist name selected by MR while creating request
4.6	Doctor	Read Only	Autofill, shows Doctor name selected by MR while creating request
4.7	Speciality	Read Only	Autofill, shows speciality of Doctor selected by MR while creating request
4.8	Region	Read Only	Autofill, shows region of Doctor belongs to
4.9	Doctor's type	Read Only	Autofill, shows type of Doctor selected by MR while creating request
4.10	Chemist attached to Doctor	Read Only	Autofill, shows Chemist attached to Doctor selected by MR while creating request
4.11	Doctor's prescription	Read Only	Autofill, allows to download

			Doctor prescription, uploaded by MR while creating request
4.12	Doctor Potential	Read Only	Autofill, Doctor potential in RS (average of 3 months) Source Superman app or SAP
4.13	Doctor Support	Read Only	Autofill, Doctor Support in RS (average of 3 months) Source Superman app or SAP
4.14	Requests raised this quarter	Read Only	Autofill, will show number of requests raised for Doctor in this quarter, including Pending, Approved, Rejected
4.15	Bonus amount raised this quarter	Read Only	Autofill, bonus amount in RS on the basis of request raised for Doctor in this quarter, Source Superman app or SAP
4.16	Request raised this quarter by Stockist	Read Only	Autofill, request raised for specific Stockist for same Doctor in this quarter, Source Superman app or SAP
5 Product Details Mankind			
5.1	Selected products	Read Only	Autofill, shows list of products for which request has been created
5.2	Required extra	Read Only	Autofill, shows extra %age discount requested in request for specific product
5.3	Monthly Consumption	Read Only	Autofill, shows number of monthly consumptions of specific product
5.4	Bonus	Read Only	Autofill, shows bonus value

5.5	Company Name	-	Will be blank for Mankind products always
6 Product Details Competitor			
6.1	Selected products	Read Only	Autofill, shows list of competitor product against each product if added by MR while creating request
6.2	Required extra	Read Only	Autofill, shows extra %age discount filled by MR for competitor product
6.3	Monthly Consumption	Read Only	Autofill, shows number of monthly consumptions filled by MR for competitor product
6.4	Bonus	Read Only	Autofill, shows bonus value filled by MR for competitor product
6.5	Company Name	Read Only	Autofill, shows company name of product filled by MR for competitor product
7 Remarks			
7.1	MR's Remarks	Read Only	Autofill, shows Remarks entered by MR before sending the request for approval
7.2	FLM's Remarks	Read Only	Autofill, shows Remarks entered by FLM before sending the request for approval
7.3	SLM's Remarks	Read Only	Autofill, shows Remarks entered by SLM before sending the request for approval
7.4	Enter your remarks	Text box	Allows TLM to enter his/her remarks before approval

Use Case:-

Use case ID	UC-CN/ZHO -19
Use case	Approve/Reject CN and ZHO requests
Priority	High
Actor(s)	TLM
Description	From this screen, user will be able to Accept/Reject the CN and ZHO requests approved by SLM(s). After approval of TLM, each request will be sent for approval as per Mankind hierarchy which is {FC→PMT (if required)}. Once request has been approved from TLM, it will be sent to subsequent team (FC) for approval. Before the TLM approval, request must be approved by SLM. User will also be able to write the remarks for acceptance/rejection. In case of acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.
Preconditions	This use case starts when user wants to approve/reject CN or ZHO open requests for logged in TLM approval which was approved by assigned SLM(s). User must be logged in. User must have access to Credit Note and ZHO module.
Post conditions	• The user will able to view open CN and ZHO requests for TLM approval along with its status and required actions. • User will be able to view details like approval status, request details, product details and remarks entered by MR and managers. • User will be able to approve/reject open CN and ZHO requests for TLM approval. • User will also be able to enter remarks before approve/reject the request.
Basic flow of events	1. User will login in the application 2. User will click on the "Admin" tab from left panel. 3. User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard: a. Approve Requests – Credit Note and ZHO request tab separately b. Summary c. Tab Filter – To filter requests based on All, Prior approval (application pending for TLM approval), Claim submission approval (claim pending for TLM approval), Approved (applications and claims) d. Claim no. – to search request via claim no. e. Select MR – to filter request on the basis of selected single MR from

	drop down f. Claim no. – Shows claim number g. Date - shows date of h. Stockist i. Station j. Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: Application Approved by SL, TL, PMT, FC or CN – Turquoise Claim Approved by SL, TL or CN – Turquoise Prior Approval Pending – Amber Claim Approval Pending – Amber Prior Approval Pending by SL, TL, PMT, FC – Amber Claim Approval Pending by SL, TL, CN – Amber Application Rejected by SL, TL, PMT or FC – Red Claim Rejected by SL, TL or CN – Red k. Sales Value (in RS.) of order (invoice value after discount) l. Actions – it will show actions based on request status like: Check application – On open approval requests for CN and ZHO application Check claim – On open approval request for claim Review – On Approved requests 6. User Clicks on Approve Requests tab to get redirected and view all the CN and ZHO request separately available for TLM approval. 6.1 User can click on Credit note Requests to redirect on CN requests page where user can view all CN requests from all assigned SLM's. 6.2 User can click on ZHO Requests to redirect on ZHO request page where user can view all ZHO requests from all assigned SLM's. 7. User Clicks on Check Application, to get re-directed on approve application page. 8. User will be able to view details like approval status, request details, product details and remarks entered by MR and managers. 8.1 Approval status 8.1.1 Prior approval – will show application approval status of each manager and team. 8.1.2 Claims approval – will show claim approval status of each manager and team. 8.2 Request Details 8.2.1 Created By – will show name of MR who created the request 8.2.2 Claim No. – will show Claim no. 8.2.3 Date – will show Date of 8.2.4 C & F – will show C & F name 8.2.5 Stockist – will show Stockist name 8.2.6 Doctor – will show Doctor name 8.2.7 Specialty – will show Doctor specialty 8.2.8 Region – will show Doctor region
--	--

	8.2.9 Doctor's type – will show type of Doctor selected by MR while creating request 8.2.10 Chemist attached to Doctor – will show Chemist attached to Doctor selected by MR while creating request 8.2.11 Doctor's prescription – will download Doctor prescription, uploaded by MR while creating request 8.2.12 Doctor Potential – will show Doctor potential in RS (average of 3 months) Source Superman app or SAP 8.2.13 Doctor Support – will show Doctor Support in RS (average of 3 months) Source Superman app or SAP 8.2.14 Requests raised this quarter – will show number of requests raised for Doctor in this quarter, including Pending, Approved, Rejected 8.2.15 Bonus amount raised this quarter – will show bonus amount in RS on the basis of request raised for Doctor in this quarter, Source Superman app or SAP 8.2.16 Request raised this quarter by Stockist – will show request raised for specific Stockist for same Doctor in this quarter, Source Superman app or SAP 8.3 Product details of Mankind 8.3.1 Selected products – will show list of products for which request has been created 8.3.2 Required extra – will show extra %age discount requested in request for specific product 8.3.3 Monthly Consumption – will show number of monthly consumptions of specific product 8.3.4 Bonus – will show bonus value 8.3.5 Company Name – Will be blank for Mankind products always 8.4 Product details of Competitor 8.4.1 Selected products (competitor) – will list of competitor product against each product if added by MR while creating request 8.4.2 Required extra (competitor) – will show extra %age discount filled by MR for competitor product 8.4.3 Monthly Consumption (competitor) – will show number of monthly consumptions filled by MR for competitor product 8.4.4 Bonus (competitor) – will show bonus value filled by MR for competitor product 8.4.5 Company Name (competitor) – will show company name of product filled by MR for competitor product 8.5 Remarks 8.5.1 MR's Remarks – will show MR's remarks 8.5.2 FLM's Remarks – will show FLM's remarks 8.5.3 SLM's Remarks – will show SLM's remarks 8.5.4 Remarks – will allow user to enter remarks in text box 9. User can also be able to download Doctor's prescription, by clicking on file name showing below Doctor's prescription field under request details section which was uploaded by MR or FLM. 10. User can enter remarks in text box before approving and rejecting the request. MR, FLM and SLM would also be able to view TLM remarks.
--	---

	11. User can view remarks of MR, FLM and SLM too. 12. User can click on Approve button, to approve the application. Once approved by TLM, request will be sent for FC team approval and MR will be notified. 13. User can click on Reject button, to reject the application. Once rejected by TLM, request will not be sent for FC team approval. In case of Rejection only, below managers shall also be notified along with MR. 14. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. User should be able to click on Check application button to get redirected on application approval page. 6. User should be able to view Doctor's prescription file name. it should be clickable. If user clicks on file name, it should be downloaded. 7. There should be an Approve Application button. It should be clickable. On click of approve application button, request should be approved and sent to FC team for approval. MR should be notified. 8. There should be a Reject button. It should be clickable. On click of reject button, request should be rejected and will not be sent to FC team for approval. In case of Rejection only, below managers shall also be notified along with MR. 9. There should a text box for user to enter remarks. It should be clickable. Remarks would be mandatory for rejection. Note: Vacant Check If an TLM is vacant, and no action is taken for 48 hours, then it will be forwarded to the next level and approval status show Vacant (no action taken). (E.g. if FLM is vacant, then it will be escalated to FC team.)
Frequency	Every time, when user wants view and approve/reject all open CN and ZHO requests for TLM approval.

9.6.3 APPROVE/REJECT CLAIMS

Description: - This screen will allow user to Accept/Reject the claims approved by SLM against each CN or ZHO request. After approval of TLM, each claim request will be sent for approval as per Mankind hierarchy which is {CN (if required)}. Once claim request has been approved from TLM, it will be sent to subsequent team (CN) for approval. Before the TLM approval, request must be approved by SLM. User will have an option to write the remarks for acceptance/rejection. In case of acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.

Prototype:

User can click on Credit note Requests to redirect on CN requests page where user can view all CN requests from all assigned SLM's. b. User can click on ZHO Requests to redirect on ZHO request page where user can view all ZHO requests from all assigned SLM's 7. User Clicks on Check Claim, to get re-directed on approve claim page. 8. User will be able to view details like approval status, request details, product details, Supply bills and remarks. 8.1 Approval status 8.1.1 Prior approval – will show claim approval status of each manager and team. 8.1.2 Claims approval – will show claim approval status of each manager and team. 8.2 Request Details 8.2.1 Created By – will show name of MR who created the request 8.2.2 Claim No. – will show Claim no. 8.2.3 Date – will show Date of 8.2.4 C & F – will show C & F name 8.2.5 Stockist – will show Stockist name 8.2.6 Doctor – will show Doctor name 8.2.7 Specialty – will show Doctor specialty 8.2.8 Region – will show Doctor region 8.2.9 Doctor's type – will show type of Doctor selected by MR while creating request 8.2.10 Chemist attached to Doctor – will show Chemist attached to Doctor
--	---

	selected by MR while creating request 8.3 Product details of each product 8.3.1 Product Name – will show product name 8.3.2 Invoice No. – will show invoice number 8.3.3 Batch – will show batch name 8.3.4 Date – will show date of 8.3.5 MRP – will show product MRP 8.3.6 PTR – will show price of product to retailer 8.3.7 PTS – will show price of product to Stockist 8.3.8 Supply Qty – will show supplied quantity of product under order 8.3.9 Bonus – will show bonus value 8.3.10 IN% – will show IN %age 8.3.11 Total Qty. – will show total quantity of order 8.3.12 Cons – will show cons 8.3.13 Allowed Qty – will show allowed quantity of product 8.3.14 Bill No. – will show bill no. 8.3.15 Bill Date – will show bill date 8.4 Supply Bills 8.4.1 Bill No. – will show bill no. 8.4.2 Bill Date – will show bill date 8.4.2 Bill Copy – Clickable, will show bill copy(s) name and allow user to view download respective bill 8.4 Remarks 8.4.1 MR's Remarks – will show MR's remarks 8.4.2 FLM's Remarks – will show FLM's remarks 8.4.3 SLM's Remarks – will show SLM's remarks 8.4.4 Remarks – will allow user to enter remarks in text box 9. User can also be able to download Doctor's prescription, by clicking on file name showing below Doctor's prescription field under request details section which was uploaded by MR or FLM. 10. User can also be able to view and download supply bill(s) uploaded by MR's or FLM, by clicking on bill copy name showing below bill copy field under supply bills section which was uploaded by MR. 11. User will be able to enter remarks in text box before approving/rejecting the request. Those remarks will be shown to MR and Managers both. 12. User can click on Approve Claim button, to approve the claim. Once approved by TLM, claim will be sent to CN team for approval and MR will be notified. 13. User can click on Reject button, to reject the claim. Once rejected by TLM, request will not be sent for CN team approval. In case of Rejection only, below managers shall also be notified along with MR. 14. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. User should be able to click on Check Claim button to get redirected on claim approval page.

	6. User should be able to view Doctor's prescription file name. it should be clickable. If user clicks on file name, it should be downloaded. 7. User should be able to view supply bill(s) file names. it should be clickable. If user clicks on file name, it should be viewable and downloaded too. 8. There should be an Approve Claim button. It should be clickable. On click of approve claim button, claim should be approved and sent to CN team for approval. MR should be notified. 9. There should be a Reject button. It should be clickable. On click of reject button, claim should be rejected and will not be sent to CN team for approval. In case of Rejection only, below managers shall also be notified along with MR. 10. There should a text box for user to enter remarks. It should be clickable. Remarks would be mandatory for rejection. Note: Vacant Check If an TLM is vacant, and no action is taken for 48 hours, then it will be forwarded to the next level and approval status show Vacant (no action taken). (E.g. if TLM is vacant, then it will be escalated to CN team.)
Frequency	Every time, when user wants view and approve/reject all open claims for TLM approval.

9.6.4 SUMMARY

Description: - This screen will help user to view summary of CN and ZHO requests on which Credit note or ZHO number has been generated by SAP. User will also be able view data by filters of time period (from/to date selection) and drop-down selections of MR & Stockist. User will have an option to view CN and ZHO requests segregated on the basis of total orders, sales values and Average extra discount which can be further segregated by Doctor, Stockist and product wise.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1	Summary	Tab	On click, can view or re-direct to summary page
2	From date	Calendar icon	Clickable, will open a calendar for

			user to select single date. User can select previous dates.
3	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
4	MR	Dropdown	Clickable, shows assigned list of MR's and allows to select multiple MR
5	Stockist	Dropdown	Clickable, shows Stockist and allows to select single value
6	Go	Button	To apply the filters and update the summary details
7. Total Order tile			
7.1	Total Order number	Read only	Autofill, shows total no. of orders of CN and ZHO
7.2	Total Sales Value (in RS)	Read only	Autofill, shows total sales value of Pool in RS
7.3	Sales Value (in RS)	Read only	Autofill, shows total value of CN/ZHO orders in RS (invoice value after discount)
7.4	GST (in Rs)	Read only	Autofill, shows value GST based on total order in RS
7.5	Average Extra Discount	Read only	Autofill, shows average %age of discount requested via CN and ZHO requests
8. Credit Note Orders			

8.1	Credit Note Order number	Read only	Autofill, shows total no. of CN orders only
8.2	% Contribution of CN to Total sales	Read only	Autofill, shows contribution of CN in %age to total sales
8.3	Sales Value (in RS)	Read only	Autofill, shows total sales value of CN orders in RS (invoice value after discount)

11.2.2	Sales Value	Read only	Autofill, shows sales value of CN

			orders Stockist wise in RS (invoice value after discount)
11.2.3	AVG. Extra Discount	Read only	Autofill, shows average %age discount of CN orders Stockist wise
11.3 ZHO Orders			
11.3.1	Total Orders	Read only	Autofill, shows total no. of ZHO orders Stockist wise
11.3.2	Sales Value	Read only	Autofill, shows sales value of ZHO orders Stockist wise in RS (invoice value after discount)
11.3.3	AVG. Extra Discount	Read only	Autofill, shows average %age discount of ZHO orders Stockist wise
12. Products			
12.1	Product Name	Read only	Autofill
12.2 Credit Note			
12.2.1	Total Orders	Read only	Autofill, shows total no. of CN orders Product wise
12.2.2	Sales Value	Read only	Autofill, shows sales value of CN orders Product wise in RS (invoice value after discount)
12.2.3	AVG. Extra Discount	Read only	Autofill, shows average %age discount of CN orders Product wise
12.3 ZHO Orders			
12.3.1	Total Orders	Read only	Autofill, shows total no. of ZHO

SRS/0.2

Software Requirement Specification

			orders Product wise
12.3.2	Sales Value	Read only	Autofill, shows sales value of ZHO orders Product wise in RS (invoice value after discount)
12.3.3	AVG. Extra Discount	Read only	Autofill, shows average %age discount of ZHO orders Product wise

Use case:

Use case ID	UC-CN/ZHO -21
Use case	Summary
Priority	High
Actor(s)	TLM
Description	From this screen, user will be able to view summary of CN and ZHO requests on which Credit note or ZHO number has been generated by SAP. User will also be able view data by filters of time period (from/to date selection) and drop-down selections of MR & Stockist. User will also be able to view CN and ZHO requests segregated on the basis of total orders sales values and Average extra discount which can be further segregated by Doctor, Stockist and product wise.
Preconditions	This use case starts when user wants view summary of CN, ZHO and Total orders along with Doctor, stickist and product wise. User must be logged in. User must also have an access of admin under superman app. User must have clicked on Summary tab from CN/ZHO dashboard.
Post conditions	The user will able to view summary of CN, ZHO and Total orders along with Doctor support and potential. User will also be able to filter data on the basis of time duration selection and dropdown selections of MR and Stockist.
Basic flow of events	1. User will login in the application 2. User will click on the "Admin" tab from left panel. 3. User will click on the "Credit Note and ZHO" option to get re-directed to CN and ZHO dashboard. 4. User will be redirected to CN and ZHO dashboard 5. User will be able to view the following information in the dashboard:

	5.1 Approve Requests – Credit Note and ZHO request tab separately 5.2 Summary 5.3 Tab Filter – To filter requests based on All, Prior approval (application pending for TLM approval), Claim submission approval (claim pending for TLM approval), Approved (applications and claims) 5.4 Claim no. – to search request via claim no. 5.5 Select MR – to filter request on the basis of selected single MR from drop down 5.6 Claim no. – Shows claim number 5.7 Date - shows date of 5.8 Stockist 5.9 Station 5.10 Status - it will show request statuses from Approved, Pending and Rejected on the basis of each manager. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: Application Approved by SL, TL, PMT, FC or CN – Turquoise Claim Approved by SL, TL or CN – Turquoise Prior Approval Pending – Amber Claim Approval Pending – Amber Prior Approval Pending by SL, TL, PMT, FC – Amber Claim Approval Pending by SL, TL, CN – Amber Application Rejected by SL, TL, PMT or FC – Red Claim Rejected by SL, TL or CN – Red 5.11 Sales Value (in RS.) of order (invoice value after discount) 5.12 Actions – it will show actions based on request status like: Check application – On open approval requests for CN and ZHO application Check claim – On open approval request for claim Review – On Approved requests 6. On the click on Summary tab, user will be re-directed to summary page 7. User can filter the summary by selecting time period (from/to date). 8. User can also filter the data on the basis multiple MR selections from list of assigned MR's. 9. User can also filter the data on the basis of single Stockist selection. 10. User can click Go button to apply the filters. 11. On the click of Go button, values of components showing under summary page will be updated with applied filters. 12. User will be able to view summary of following components on this page: 12.1 Total order tile: 12.1.1 Total Order number – Will show total of CN and ZHO orders 12.1.2 Total Sales Value (in RS) – Will show total sales value of Pool 12.1.3 Sales Value (in RS) - will show sales value of CN/ZHO orders 12.1.4 GST (in Rs) – Will show total GST of CN and ZHO orders 12.1.5 Average Extra Discount – Will show total of average %age discount claimed under CN and ZHO orders 12.2 Credit Note orders tile: 12.2.1 Credit Note Order number – Will show total of CN orders only
--	---

	12.2.2 % Contribution of CN to Total sales – Will show contribution of CN in %age to total sales 12.2.3 Sales Value (in RS) – Will show total sales value of CN orders only in RS. (invoice value after discount) 12.2.4 GST (in RS) – Will show total GST of CN orders only 12.2.5 Average Extra Discount – Will show total of average %age discount claimed under CN orders only 12.3ZHO Orders tile: 12.3.1 ZHO Order number – Will show total of CN orders only 12.3.2 Sales Value (in RS) – Will show total sales value of ZHO orders only in RS. (invoice value after discount) (AVG. of last 3 Months) 12.3.3 GST (in RS) – Will show total GST of ZHO orders only 12.3.4 Average Extra Discount – Will show total of average %age discount claimed under ZHO orders only 12.4Doctors wise: 12.4.1 Doctor Name – will show Doctor name and image 12.4.2 Support – Will show average support of 3 months by Doctor in terms of selling Mankind medicines in value 12.4.3 Potential – will show potential of Doctor in value in which DR can help selling Mankind Medicines 12.4.4 Credit Note: 12.4.4.1 Total Orders – Will show total no. of CN orders Doctor wise 12.4.4.2 Sales Value – Will shows sales value of CN orders Doctor wise (invoice value after discount) (AVG. of last 3 Months) 12.4.4.3 AVG. Extra Discount – Will show average %age discount of CN orders Doctor wise 12.4.5 ZHO 12.4.4.1 Total Orders – Will show total no. of ZHO orders Doctor wise 12.4.4.2 Sales Value – Will shows sales value of ZHO orders Doctor wise (invoice value after discount) 12.4.4.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Doctor wise 12.5Stockist Wise 12.5.1 Stockist Name – will show Stockist name without image 12.5.2 Credit Note: 12.5.2.1 Total Orders – Will show total no. of CN orders Stockist wise 12.5.2.2 Sales Value – Will shows sales value of CN orders Stockist wise (invoice value after discount) 12.5.2.3 AVG. Extra Discount – Will show average %age discount of CN orders Stockist wise 12.5.3 ZHO 12.5.3.1 Total Orders – Will show total no. of ZHO orders Stockist wise 12.5.3.2 Sales Value – Will shows sales value of ZHO orders Stockist wise 12.5.3.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Stockist wise 12.6Product Wise
--	---

	12.6.1 Product Name – will show Product name without image 12.6.2 Credit Note: 12.6.2.1 Total Orders – Will show total no. of CN orders Product wise 12.6.2.2 Sales Value – Will shows sales value of CN orders Product wise (invoice value after discount) 12.6.2.3 AVG. Extra Discount – Will show average %age discount of CN orders Product wise 12.6.3 ZHO 12.6.3.1 Total Orders – Will show total no. of ZHO orders Product wise 12.6.3.2 Sales Value – Will shows sales value of ZHO orders Product wise (invoice value after discount) 12.6.3.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Product wise 13. The use case ends. Note: Details for Credit note will be populated on this page after CN has been generated by SAP. Details for ZHO will be populated after supply bill has been approved by CN team on this page. Amount for both will be procured from SAP.
Acceptance Criteria	- There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. - There should be dropdown for MR selection. It should be clickable. User should be allowed to select multiple MR's. - There should be dropdown for Stockist selection. It should be clickable. User should be allowed to select single Stockist - Search - User will be able to search the claims based on Claim number. - User will be able to click search bar. - User will be able to input in the search bar. - Search will be applied automatically and search results will be displayed after inputting 3 numbers. - On inputting any number in search bar, a cross icon should be displayed to user in search bar. - User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. - On click cross icon, search input will be reset and data in list will be displayed accordingly. - There should be a Go button and it should be clickable. On the click of Go button filters should be applied and data should be updated or shown on the basis of filters. - There should be 3 tabs for Doctors, Stockist and Product. Each tab should show the data on the basis of respective tab of CN and ZHO orders.
Frequency	Every time, when user want to view summary of CN and ZHO orders.

9.7 FC (FIELD COORDINATORS) TEAM FUNCTIONALITY

There would be various features available to FC team in this module as described below:

9.7.1 CREDIT NOTE AND ZHO DASHBOARD

Description: - This screen will help the FC team to view all/open CN and ZHO requests separately for FC team approval which was approved by TLM, along with its status and required actions. User will also have an option to view summary of CN and ZHO requests. FC team functionalities would not be part of Superman app. User can access this module functionalities under existing Mankind Admin portal. FC team user will have a web version to access the functionalities without tablet and offline version.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Requests	Tab	Shows along with number of open requests. Re-directs to ZHO requests page
2	Summary	Tab	Re-directs to Summary page
3	Update Allowed Discount %	Tab	Re-directs to update allowed discount %age on product level page
4	Credit Note Requests	Tab	Re-directs to CN requests page
5	ZHO Requests	Tab	Re-directs to ZHO requests page
6	Tab Filter	Tabs	Clickable to filter data (All, Prior approval, claim submission, Approved)
7	Search	Text box	Search by Claim Number. Search will be applied automatically and

			search results will be displayed after inputting 3 characters
8	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.
9	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
10	Select State	Drop Down	Shows all the states of India, allows to select single state from drop down
11	Select HQ	Drop Down	Shows all the Headquarter of India, allows to select single HQ from drop down
12	Select MR	Drop Down	Shows all the MR's, allows to select single MR from drop down
13	Go	Button	To apply the filters
14	Claim No.	Read Only	Autofill
15	Date	Read Only	Autofill, shows date of
16	Stockist	Read Only	Autofill
17	Station	Read Only	Autofill
18	Status	Read Only	Autofill, Prior approval pending, claim approval pending, claim approval by SL, TL, PMT, FC (manager or team)
19	Sales value (in RS.)	Read Only	Autofill, shows sales Value (in Rs) for that order (invoice value after

SRS/0.2

Software Requirement Specification

			discount)
20	Actions	Button	Shows required respective actions for request, To re-direct to perform actions like Check Application (for CN/ZHO application approvals)/ Review (for approved)
21	Back	Icon	Clickable, to re-direct user to previous page

Use Case:-

Use case ID	UC-CN/ZHO -22
Use case	Credit Note and ZHO Dashboard
Priority	High
Actor(s)	FC Team
Description	From this screen, FC team will be able to view all/open CN and ZHO requests separately for FC team approval which was approved by TLM, along with its status and required actions. User will also have an option to view summary of CN and ZHO requests. User can access this module functionalities under existing Mankind Admin portal.
Preconditions	This use case starts when user wants to view CN or ZHO all/open approval requests for logged in TLM which was approved by assigned SLM's. User must be logged in. User must have access to Credit Note and ZHO module.
Post conditions	- The user will able to view all/open CN and ZHO requests for FC team approval along with its status and required actions. - User will be able to filter requests. - User will be able to search requests based on claim no. - User will be able to re-direct on summary page.

	- User will be able to re-direct on update allowed discount % page. - User will be able to re-direct on check application page to approve application. User can also be able to re-direct to review page.
Basic flow of events	- User will login in the application - User will click on the "Credit Note/ZHO Management" from left panel. - User will be redirected to CN and ZHO dashboard - User will be able to view the following information in the dashboard: - Approve Requests – Credit Note and ZHO request tab separately - Summary - Update Allowed discount % - allow to update product allowed discount %age - Tab Filter – To filter requests based on All, Prior approval (application pending for FC team approval), Approved applications - Claim no. – to search request via claim no. - Select State - Select HQ - Select MR – to filter request on the basis of selected single MR from drop down - Claim no. – shows claim number - Date - shows date of - Stockist - Station - Status - it will show request status from Approved, Pending and Rejected. Those statuses should update dynamically on the basis of respective manager approvals, pendency's and rejections. Statuses should be denoted with following colors too: - Application Approved by SL, TL, PMT, FC or CN – Turquoise - Claim Approved by SL, TL or CN – Turquoise - Prior Approval Pending – Amber - Claim Approval Pending – Amber - Prior Approval Pending by SL, TL, PMT, FC – Amber - Claim Approval Pending by SL, TL, CN – Amber - Application Rejected by SL, TL, PMT or FC – Red - Claim Rejected by SL, TL or CN – Red - Sales Value (in RS.) of order (invoice value after discount) - Actions – it will show actions based on request status like: - Check application – On open approval requests for CN and ZHO application - Review – On Approved requests - User can click on Approve Requests tab to redirect view all the CN and ZHO request separately. By default, user will land on this page after the selection of Credit Note and ZHO from previous screen. - User can click on Credit note Requests to redirect on CN requests page where user can view all CN requests from all over India. - User can click on ZHO Requests to redirect on ZHO request page where user can view all ZHO requests from all over India. - User can view number of open or to be worked upon requests next to Approve Requests tab.

	7. User can filter the CN and ZHO requests based on All, Prior approval and Approved. 8. User can view all credit note/ZHO requests, on the click of all tab. 9. User can view all pending approval credit note/ZHO requests, on the click of prior approval tab. 10. User can view all approved credit note/ZHO requests, on the click of approved tab. 11. User can filter the data by selecting time period (from/to date). 12. User can filter the data by selecting one of the states from State drop down. 13. User can filter the date by selecting one of the HQ's from HQ drop down. 14. User can also filter the requests by selecting one of the MR's all over India 15. User can click on Go button, to apply the filters. 16. User can search the request by claim no. as well. 17. User can click on Check Application, to get re-directed on approve application page. 17. User can click on Review button, to get redirected to review details page for approved requests. On click of Review button, a pop-up will be open where user can view order details. From where user will be able to download request review page details as well in PDF format by clicking on download icon. 18. User can also click on Summary tab to get redirected on Summary page. 19. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. There should be clickable All, Prior Approval and Approved tabs to filter the CN or ZHO requests. On the click of each tab requests should be filtered based on selection. 6. There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. 7. There should be State drop down. It should be clickable. User should be allowed to select single state from all states. 8. There should be HQ drop down. It should be clickable. User should be allowed to select single HQ from all HQ's. 9. There should be MR drop down. It should be clickable. User will be allowed to select single MR from all over India. 10. Search - User will be able to search the claims based on Claim number. 10.1. User will be able to click search bar. 10.2. User will be able to input in the search bar. 10.3. Search will be applied automatically and search results will be displayed after inputting 3 numbers. 10.4. On inputting any number in search bar, a cross icon should be displayed to user in search bar. 10.5. User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. 10.6. On click cross icon, search input will be reset and data in list will be displayed accordingly.

	11. There should be a Go button and it should be clickable. On the click of Go button, filters should be applied and data should be updated or shown on the basis respective filters. 12. User should be able to click on Summary tab. 13. User should be able to click on Check application and review buttons to get redirected on respective page. 14. There should be a Review button and it should be clickable. On the click of review button, user should be re-directed to review pop-up. On Review page, there should be a Download icon. It should be clickable and download the review page details in PDF format.
Frequency	Every time, when user wants view all/open CN and ZHO requests for FC team approval and take respective actions.

9.7.2 APPROVE/REJECT CN/ZHO REQUESTS

Description: - This screen will allow user to Accept/Reject the CN and ZHO requests approved by TLM. At the time of FC approval, need to check allowed %age discount of product. If CN or ZHO request %age is higher then allowed %age discount then request will be automatically sent for PMT head approval. Otherwise, request will be completed after FC approval. User will have an option to write the remarks for acceptance/rejection. In case of acceptance/rejection, MR will be notified through notification for the same. In case of Rejection only, below managers shall also be notified along with MR.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Application	Button	Clickable, to approve the application
2	Reject	Button	Clickable, to reject the application
3 Approval Status			

3.1	Prior approval	Read Only	Auto fill, shows application approval status of each manager and team
3.2	Claims Approval	Read Only	Auto fill, shows claim approval status of each manager and team
4 Request Details			
4.1	Created BY	Read Only	Auto fill, shows name of MR who created the request
4.2	Claim No.	Read Only	Auto fill, shows Claim no.
4.3	Date	Read Only	Auto fill, shows date of
4.4	C & F	Read Only	Auto fill, shows C & F name selected by MR while creating request
4.5	Stockist	Read Only	Autofill, shows Stockist name selected by MR while creating request
4.6	Doctor	Read Only	Autofill, shows Doctor name selected by MR while creating request
4.7	Speciality	Read Only	Autofill, shows speciality of Doctor selected by MR while creating request
4.8	Region	Read Only	Autofill, shows region of Doctor belongs to
4.9	Doctor's type	Read Only	Autofill, shows type of Doctor selected by MR while creating request
4.10	Chemist attached to Doctor	Read Only	Autofill, shows Chemist attached to Doctor selected by MR while

			creating request
4.11	Doctor's prescription	Read Only	Autofill, allows to download Doctor prescription, uploaded by MR while creating request
4.12	Doctor Potential	Read Only	Autofill, Doctor potential in RS (average of 3 months) Source Superman app or SAP
4.13	Doctor Support	Read Only	Autofill, Doctor Support in RS (average of 3 months) Source Superman app or SAP
4.14	Requests raised this quarter	Read Only	Autofill, will show number of requests raised for Doctor in this quarter, including Pending, Approved, Rejected
4.15	Bonus amount raised this quarter	Read Only	Autofill, bonus amount in RS on the basis of request raised for Doctor in this quarter, Source Superman app or SAP
4.16	Request raised this quarter by Stockist	Read Only	Autofill, request raised for specific Stockist for same Doctor in this quarter, Source Superman app or SAP
5 Product Details Mankind			
5.1	Selected products	Read Only	Autofill, shows list of products for which request has been created
5.2	Required extra	Read Only	Autofill, shows extra %age discount requested in request for specific product
5.3	Allowed discount %age	Read Only	Autofill, shows allowed %age discount

SRS/0.2

Software Requirement Specification

5.4	Monthly Consumption	Read Only	Autofill, shows number of monthly consumptions of specific product
5.5	Bonus	Read Only	Autofill, shows bonus value
5.6	Company Name	-	Will be blank for Mankind products always
6 Product Details Competitor			
6.1	Selected products	Read Only	Autofill, shows list of competitor product against each product if added by MR while creating request
6.2	Required extra	Read Only	Autofill, shows extra %age discount filled by MR for competitor product
6.3	Monthly Consumption	Read Only	Autofill, shows number of monthly consumptions filled by MR for competitor product
6.4	Bonus	Read Only	Autofill, shows bonus value filled by MR for competitor product
6.5	Company Name	Read Only	Autofill, shows company name of product filled by MR for competitor product
7 Remarks			
7.1	MR's Remarks	Read Only	Autofill, shows Remarks entered by MR before sending the request for approval
7.2	FLM's Remarks	Read Only	Autofill, shows Remarks entered by FLM before sending the request for approval

SRS/0.2

--	--

	12.6.3.1 Total Orders – Will show total no. of ZHO orders Product wise 12.6.3.2 Sales Value – Will shows sales value of ZHO orders Product wise (invoice value after discount) 12.6.3.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Product wise 13. The use case ends. Note: Details for Credit note will be populated on this page after CN has been generated by SAP. Details for ZHO will be populated after supply bill has been approved by CN team on this page. Amount for both will be procured from SAP.
Acceptance Criteria	- There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. - There should be dropdown for HQ selection. It should be clickable. User should be allowed to select multiple HQ's. - There should be dropdown for Stockist selection. It should be clickable. User should be allowed to select single Stockist - Search - User will be able to search the claims based on Claim number. - User will be able to click search bar. - User will be able to input in the search bar. - Search will be applied automatically and search results will be displayed after inputting 3 numbers. - On inputting any number in search bar, a cross icon should be displayed to user in search bar. - User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. - On click cross icon, search input will be reset and data in list will be displayed accordingly. - There should be a Go button and it should be clickable. On the click of Go button filters should be applied and data should be updated or shown on the basis of filters. - There should be 3 tabs for Doctors, Stockist and Product. Each tab should show the data on the basis of respective tab of CN and ZHO orders.
Frequency	Every time, when user want to view summary of CN and ZHO orders.

9.8 PMT HEAD MANAGER FUNCTIONALITY

9.8.1 CREDIT NOTE AND ZHO DASHBOARD

Description: - This screen will help the PMT head to view all/open CN and ZHO requests separately for PMT head approval which was approved by all managers (FLM, SLM, TLM) and FC team, along with its

status and required actions. If request available for PMT head approval, it means discount requested under CN/ZHO request is higher than allowed %age discount. User will also have an option to view summary of CN and ZHO requests from all over India. PMT head user will require web version to access the functionalities without tablet and offline version. User can access this module functionalities under existing Mankind Admin portal.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Requests	Tab	Shows along with number of open requests. Re-directs to ZHO requests page
2	Summary	Tab	Re-directs to Summary page
3	Credit Note Requests	Tab	Re-directs to CN requests page
4	ZHO Requests	Tab	Re-directs to ZHO requests page
5	Tab Filter	Tabs	Clickable to filter data (All, Prior approval, Approved)
6	Search	Text box	Search by Claim Number. Search will be applied automatically and search results will be displayed after inputting 3 characters
7	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.
8	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from

			date'
9	Select Division	Drop Down	Shows all the Divisions of Mankind, allows to select single division from drop down
10	Select State	Drop Down	Shows all the states of India, allows to select single state from drop down
11	Select HQ	Drop Down	Shows all the HQ of India, allows to select single HQ from drop down
12	Select MR	Drop Down	Shows all the MR's allows to select single MR from drop down
13	Go	Button	To apply the filters
14	Claim No.	Read Only	Autofill
15	Date	Read Only	Autofill, shows date of
16	Stockist	Read Only	Autofill
17	Station	Read Only	Autofill
18	Status	Read Only	Autofill, Prior approval pending, claim approval pending, claim approval by SL, TL, PMT, FC (manager or team)
19	Sales value (in RS.)	Read Only	Autofill, shows sales Value (in Rs) for that order (invoice value after discount)
20	Actions	Button	Shows required respective actions for request, To re-direct to perform actions like Check Application (for CN/ZHO application approvals)/

			Review (for approved)
21	Back	Icon	Clickable, to re-direct user to previous page

Use Case:-

Use case ID	UC-CN/ZHO -27
Use case	Credit Note and ZHO Dashboard
Priority	High
Actor(s)	PMT Head
Description	This screen will allow PMT head to view all/open CN and ZHO requests separately for PMT head approval which was approved by all managers (FLM, SLM, TLM) and FC team, along with its status and required actions. If request available for PMT head approval, it means discount requested under CN/ZHO request is higher than allowed %age discount. User will also have an option to view summary of CN and ZHO requests of all over India. User can access this module functionalities under existing Mankind Admin portal.
Preconditions	This use case starts when user wants to view CN or ZHO all/open approval requests for PMT head which was approved by all managers and FC team. User must be logged in. User must have access to Credit Note and ZHO module.
Post conditions	- The user will able to view all/open CN and ZHO requests for PMT head approval along with its status and required actions. - User will be able to filter requests. - User will be able to search requests based on claim no. - User will be able to re-direct on summary page. - User will be able to re-direct on check application, to approve application. User can also be able to re-direct to review page.
Basic flow of events	- User will login in the application - User will click on the "Credit Note/ZHO Management" from left panel. - User will be redirected to CN and ZHO dashboard - User will be able to view the following information in the dashboard: - Approve Requests – Credit Note and ZHO request tab separately - Summary - Tab Filter – To filter requests based on All, Prior approval (application pending for PMT head approval), Approved applications - Claim no. – to search request via claim no.

	e. Select Division f. Select State g. Select HQ h. Select MR – to filter request on the basis of selected single MR from drop down i. Claim no. – shows claim number j. Date - shows date of k. Stockist l. Station m. Status - it will show request status from Approved, Pending and Rejected. Statuses should be denoted with following colors too: Approved – Turquoise Pending – Amber Rejected – Red n. Sales Value (in RS.) of order (invoice value after discount) o. Actions – it will show actions based on request status like: Check application – On open approval requests for CN and ZHO application Review – On Approved requests 5. User can click on Approve Requests tab to redirect view all the CN and ZHO request separately. By default, user will land on this page after the selection of Credit Note and ZHO from previous screen. a. User can click on Credit note Requests to redirect on CN requests page where user can view all CN requests from all over India. b. User can click on ZHO Requests to redirect on ZHO request page where user can view all ZHO requests from all over India. 6. User can view number of open or to be worked upon requests next to Approve Requests tab. 7. User can filter the CN and ZHO requests based on All, Prior approval and Approved. 8. User can view all pending application approval requests, on the click of prior approval tab. 9. User can view all approved credit note/ZHO requests, on the click of approved tab. 10. User can filter the data by selecting time period (from/to date). 11. User can also filter the requests by selecting one of the divisions from Division drop down. 12. User can also filter the requests by selecting one of the states from State drop down. 13. User can also filter the requests by selecting one of the HQ's from HQ drop down. 14. User can also filter the requests by selecting one of the MR's from MR's drop down. 15. User can click on Go button, to apply the filters. 16. User can search the request by claim no. as well. 17. User can click on Check Application, to get re-directed on approve application page. 18. User can click on Review button, to get redirected to review details page for
--	--

	approved requests. On click of Review button, a pop-up will be open where user can view order details. From where user will be able to download request review page details as well in PDF format by clicking on download icon. 18. User can also click on Summary tab to get redirected on Summary page. 19. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. There should be clickable All, Prior Approval and Approved tabs to filter the CN or ZHO requests. On the click of each tab request should be filtered. 6. There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. 7. There should be Division drop down. It should be clickable. User should be allowed to select single from all Mankind divisions. 8. There should be State drop down. It should be clickable. User should be allowed to select single state from all states. 9. There should be HQ drop down. It should be clickable. User should be allowed to select single HQ from all HQ's. 10. There should be MR drop down. It should be clickable. User will be allowed to select single MR from all MR's. 11. Search - User will be able to search the claims based on Claim number. 11.1. User will be able to click search bar. 11.2. User will be able to input in the search bar. 11.3. Search will be applied automatically and search results will be displayed after inputting 3 numbers. 11.4. On inputting any number in search bar, a cross icon should be displayed to user in search bar. 11.5. User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. 11.6. On click cross icon, search input will be reset and data in list will be displayed accordingly. 12. There should be a Go button and it should be clickable. On the click of Go button, filters should be applied and data should be updated or shown on the basis respective filters. 13. User should be able to click on Summary tab. 14. User should be able to click on check application and review button to get redirected on respective page. 15. There should be a Review button and it should be clickable. On the click of review button, user should be re-directed to review pop-up. On Review page, there should be a Download icon. It should be clickable and download the review page details in PDF format.
Frequency	Every time, when user wants view all/open CN and ZHO requests for PMT head approval and take respective actions.

9.8.2 APPROVE/REJECT CN/ZHO REQUESTS

Description: - This screen will allow user to Accept/Reject the CN and ZHO open requests separately for PMT head approval which was approved by all managers (FLM, SLM, TLM) and FC team, along with its status and required actions. If request available for PMT head approval, it means discount requested under CN/ZHO request is higher than allowed %age discount.

Prototype:

			orders Product wise
12.3.2	Sales Value	Read only	Autofill, shows sales value of ZHO orders Product wise in RS (invoice value after discount)
12.3.3	AVG. Extra Discount	Read only	Autofill, shows average %age discount of ZHO orders Product wise

Use case:

Use case ID	UC-CN/ZHO -29
Use case	Summary
Priority	High
Actor(s)	PMT
Description	From this screen, user will be able to view summary of CN and ZHO requests on which Credit note or ZHO number has been generated by SAP. User will also be able view data by filters of time period (from/to date selection) and drop-down selections of MR & Stockist. User will also be able to view CN and ZHO requests segregated on the basis of total orders sales values and Average extra discount which can be further segregated by Doctor, Stockist and product wise.
Preconditions	This use case starts when user wants view summary of CN, ZHO and Total orders along with Doctor, stickist and product wise. User must be logged in. User must also have an access of admin under superman app. User must have clicked on Summary tab from CN/ZHO dashboard.
Post conditions	The user will able to view summary of CN, ZHO and Total orders along with Doctor support and potential. User will also be able to filter data on the basis of time duration selection and dropdown selections of MR and Stockist.
Basic flow of events	1. User will login in the application 2. User will click on the "Credit Note/ZHO Management' from left panel. 3. User will be redirected to CN and ZHO dashboard 4. User will be able to view the following information in the dashboard: 4.1 Approve Requests – Credit Note and ZHO request tab separately 4.2 Summary

	4.3 Tab Filter – To filter requests based on All, Prior approval (application pending for PMT head approval), Approved applications 4.4 Claim no. – to search request via claim no. 4.5 Select Division 4.6 Select State 4.7 Select HQ 4.8 Select MR – to filter request on the basis of selected single MR from drop down 4.9 Claim no. – shows claim number 4.10 Date - shows date of 4.11 Stockist 4.12 Station 4.13 Status - it will show request status from Approved, Pending and Rejected. Statuses should be denoted with following colors too: Approved – Turquoise Pending – Amber Rejected – Red 4.14 Sales Value (in RS.) of order (invoice value after discount) 4.15 Actions – it will show actions based on request status like: Check application – On open approval requests for CN and ZHO application Review – On Approved requests 5. On the click on Summary tab, user will be re-directed to summary page 6. User can filter the summary by selecting time period (from/to date). 7. User can also filter the data on the basis multiple MR selections from list of assigned MR's. 8. User can also filter the data on the basis of single Stockist selection. 9. User can click Go button to apply the filters. 10. On the click of Go button, values of components showing under summary page will be updated with applied filters. 11. User will be able to view summary of following components on this page: 11.1 Total order tile: 12.1.1 Total Order number – Will show total of CN and ZHO orders 12.1.2 Total Sales Value (in RS) – Will show total sales value of Pool 12.1.3 Sales Value (in RS) – will show sales value of CN/ZHO orders 12.1.4 GST (in Rs) – Will show total GST of CN and ZHO orders 12.1.5 Average Extra Discount – Will show total of average %age discount claimed under CN and ZHO orders 11.2 Credit Note orders tile: 12.2.1 Credit Note Order number – Will show total of CN orders only 12.2.2 % Contribution of CN to Total sales – Will show contribution of CN in %age to total sales 12.2.3 Sales Value (in RS) – Will show total sales value of CN orders only in RS. (invoice value after discount) 12.2.4 GST (in RS) – Will show total GST of CN orders only 12.2.5 Average Extra Discount – Will show total of average %age discount claimed under CN orders only 11.3 ZHO Orders tile:
--	--

	12.3.1 ZHO Order number – Will show total of CN orders only 12.3.2 Sales Value (in RS) – Will show total sales value of ZHO orders only in RS. (invoice value after discount) (AVG. of last 3 Months) 12.3.3 GST (in RS) – Will show total GST of ZHO orders only 12.3.4 Average Extra Discount – Will show total of average %age discount claimed under ZHO orders only 11.4 Doctors wise: 12.4.1 Doctor Name – will show Doctor name and image 12.4.2 Support – Will show average support of 3 months by Doctor in terms of selling Mankind medicines in value 12.4.3 Potential – will show potential of Doctor in value in which DR can help selling Mankind Medicines 12.4.4 Credit Note: 12.4.4.1 Total Orders – Will show total no. of CN orders Doctor wise 12.4.4.2 Sales Value – Will shows sales value of CN orders Doctor wise (invoice value after discount) (AVG. of last 3 Months) 12.4.4.3 AVG. Extra Discount – Will show average %age discount of CN orders Doctor wise 12.4.5 ZHO 12.4.4.1 Total Orders – Will show total no. of ZHO orders Doctor wise 12.4.4.2 Sales Value – Will shows sales value of ZHO orders Doctor wise (invoice value after discount) 12.4.4.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Doctor wise 11.5 Stockist Wise 12.5.1 Stockist Name – will show Stockist name without image 12.5.2 Credit Note: 12.5.2.1 Total Orders – Will show total no. of CN orders Stockist wise 12.5.2.2 Sales Value – Will shows sales value of CN orders Stockist wise (invoice value after discount) 12.5.2.3 AVG. Extra Discount – Will show average %age discount of CN orders Stockist wise 12.5.3 ZHO 12.5.3.1 Total Orders – Will show total no. of ZHO orders Stockist wise 12.5.3.2 Sales Value – Will shows sales value of ZHO orders Stockist wise 12.5.3.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Stockist wise 11.6 Product Wise 12.6.1 Product Name – will show Product name without image 12.6.2 Credit Note: 12.6.2.1 Total Orders – Will show total no. of CN orders Product wise 12.6.2.2 Sales Value – Will shows sales value of CN orders Product wise (invoice value after discount) 12.6.2.3 AVG. Extra Discount – Will show average %age discount of CN orders Product wise 12.6.3 ZHO
--	--

	12.6.3.1 Total Orders – Will show total no. of ZHO orders Product wise 12.6.3.2 Sales Value – Will shows sales value of ZHO orders Product wise (invoice value after discount) 12.6.3.3 AVG. Extra Discount – Will show average %age discount of ZHO orders Product wise 12. The use case ends. Note: Details for Credit note will be populated on this page after CN has been generated by SAP. Details for ZHO will be populated after supply bill has been approved by CN team on this page. Amount for both will be procured from SAP.
Acceptance Criteria	- There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. - There should be dropdown for MR selection. It should be clickable. User should be allowed to select multiple MR's. - There should be dropdown for Stockist selection. It should be clickable. User should be allowed to select single Stockist - Search - User will be able to search the claims based on Claim number. - User will be able to click search bar. - User will be able to input in the search bar. - Search will be applied automatically and search results will be displayed after inputting 3 numbers. - On inputting any number in search bar, a cross icon should be displayed to user in search bar. - User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. - On click cross icon, search input will be reset and data in list will be displayed accordingly. - There should be a Go button and it should be clickable. On the click of Go button filters should be applied and data should be updated or shown on the basis of filters. - There should be 3 tabs for Doctors, Stockist and Product. Each tab should show the data on the basis of respective tab of CN and ZHO orders.
Frequency	Every time, when user want to view summary of CN and ZHO orders.

9.9 CN (CREDIT NOTE/ZHO) TEAM FUNCTIONALITY

There would be various features available to CN team in this module as described below:

9.9.1 CREDIT NOTE AND ZHO DASHBOARD – APPROVE/REJECT CLAIMS

Description: - This screen will help the CN team to view all/open CN and ZHO claim requests separately for CN team approval which was approved by TLM, along with its status and required actions. User will also have an option to view summary of CN and ZHO requests. CN team functionalities would not be part of Superman app. CN team user will have a web version to access the functionalities without tablet and offline version. User can access this module functionalities under existing Mankind Admin portal.

Under this module for CN team, will require to integrate with SAP for following components:

- **Forward Integration** – All details of approved claims will be sent to SAP. Once approved, each claim will get a unique CN (Credit Note) number generated through SAP, and CN number will be assigned to each claim.
- **Backward Integration** – CN Number against each approved claim will be sent from SAP to Superman.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1.	Approve Requests	Tab	Shows along with number of open requests. Re-directs to ZHO requests page
2	Summary	Tab	Re-directs to Summary page
3	Credit Note Requests	Tab	Re-directs to CN requests page
4	ZHO Requests	Tab	Re-directs to ZHO requests page
5	Tab Filter	Tabs	Clickable to filter data (All, Claim submission, Approved)
6	Search	Text box	Search by Claim Number. Search will be applied automatically and search results will be displayed after inputting 3 characters Search would be allowed to fetch up to 3 years old request by

			claim number
7	From date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates.
8	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
9	Select Division	Drop Down	Shows all the divisions of Mankind, allows to select single division from drop down
10	Select State	Drop Down	Shows all the states of India, allows to select single state from drop down
11	Select HQ	Drop Down	Shows all the HQ of India, allows to select single HQ from drop down
12	Select MR	Drop Down	Shows all the MR's allows to select single MR from drop down
13	Go	Button	To apply the filters
14	Select All	Button	Allows to select/mark all checks boxes
15	Deselect All	Button	Allows to unselect/unmark all checks boxes
16	Check box	Icon	Allows user to select/unselect or mark/unmark check boxes
17	Items selected	Read only	Dynamic, shows number of item/rows selected after selection

SRS/0.2

Software Requirement Specification

18	Claim Number	Read only	Autofill, shows claim no.
19	Stockist	Read only	Autofill, shows Stockist name
20	Stockist Station	Read only	Autofill, shows Stockist station
21	Doctor	Read only	Autofill, shows Doctor name and code
23	Retailer	Read only	Autofill, shows retailer name and code
23	DR prescription	Button	Autofill, shows Doctor prescription name and allows to download on click
24	Material Desc.	Read only	Autofill, shows product or material description
25	BATCH NO	Read only	Autofill, shows batch number
26	Official Qty	Read only	Autofill, shows official quantity
27	Official Bonus Qty	Read only	Autofill, shows official bonus quantity
28	Approved Qty	Read only	Autofill, shows approved quantity (filled by MR or FLM in request)
29	Approved Bonus Qty	Read only	Autofill, shows approved bonus quantity in CN or ZHO request
30	Supply Qty	Read only	Autofill, shows Supply quantity under request
31	Supply Bonus Qty	Read only	Autofill, shows supply bonus quantity in request
32	Difference Qty	Read only	Autofill, shows difference quantity, Difference quantity = Supply

			offer – Purchase offer
33	Extra %age	Read only	Autofill, shows (logic need to confirm)
34	Purchase no	Read only	Autofill, shows purchase number
35	Purchase date	Read only	Autofill, shows purchase date
36	Supply bill no.	Read only	Autofill, shows supply bill number
37	Supply bill date	Read only	Autofill, shows supply bill date
38	Attachment	Read only	Autofill, shows attachment (do we mean supply bills here)
39	MR Remarks	Read only	Autofill, shows MR remarks
40	FLM remarks	Read only	Autofill, shows FLM Remarks
41	SLM remarks	Read only	Autofill, shows SLM remarks
42	TLM remarks	Read only	Autofill, shows TLM remarks
43	HO remarks	Read only	Autofill, shows HO remarks (is it PMT? But PMT doesn't approve claim so can't provide remarks)
44	Bonus Amount	Read only	Autofill, shows bonus amount Difference quantity *Prices to Stockist
45	Monthly Consumption	Read only	Autofill, shows total Quantity of product supplied till date in a month from claims approved requests. Refer supply QTY.
46	Edit	Button	Allows to edit supply Qty and bonus Supply Qty
47	Save	Button	Allows to save edited fields
48	Flag	Icon	Allows to red flag the request

SRS/0.2

Software Requirement Specification

49	Add Remarks	Text field	Allows to add remarks against red flag request Where user can view red flag remarks?
50	Approve	Button	Allows to approve single/multiple selected claims
51	Reject	Button	Allows to reject single/multiple selected claims
52	Remarks	Text field	Allows to enter remarks while approving/rejecting Remarks can be same for multiple requests

Use Case:-

Use case ID	UC-CN/ZHO -30
Use case	Credit Note and ZHO Dashboard – Approve/Reject Claims
Priority	High
Actor(s)	CN Team
Description	From this screen, CN team will be able to view all/open CN and ZHO claim requests separately for CN team approval which was approved by TLM, along with its status and required actions. User will also have an option to view summary of CN and ZHO requests. CN team functionalities would not be part of Superman app. CN team user will have a web version to access the functionalities without tablet and offline version. User can access this module functionalities under existing Mankind Admin portal. Under this module for CN team, will require to integrate with SAP for following components: ○ Forward Integration – All details of approved claims will be sent to SAP. Once approved, each claim will get a unique CN (Credit Note) number generated through SAP, and CN number will be assigned to each claim. ○ Backward Integration – CN Number against each approved claim will be sent from SAP to Superman.
Preconditions	This use case starts when user wants to view CN or ZHO all/open claim approval requests which was approved by assigned TLM's. User must be logged in.

	User must have access to Credit Note and ZHO module.
Post conditions	• The user will be able to view all/open CN and ZHO claim requests for CN team approval along with its status and required actions. • User will be able to filter requests. • User will be able to search requests based on claim no. • User will be able to re-direct on summary page. • User will be able to re-direct to edit page in case of changes required.
Basic flow of events	1. User will login in the application 2. User will click on the "Credit Note/ZHO Management" from left panel. 3. User will be redirected to CN and ZHO dashboard 4. User will be able to view the following information in the dashboard for each claim which will have details of each product and batch no.: a. Approve Requests – Credit Note and ZHO request tab separately b. Summary c. Tab Filter – To filter requests based on All, claim submission (claim pending for CN team approval), Approved claims d. Monthly Consumption – will show total Quantity of product supplied till date in a month from claims approved requests. Refer supply QTY. - pp. Edit - qq. Save - rr. Flag - ss. Add discrepancy - tt. Approve - uu. Reject vv. Remarks 5. User can click on Approve Requests tab to redirect view all the CN and ZHO claim request separately. By default, user will land on this page after the selection of Credit Note and ZHO from previous screen. a. User can click on Credit note Requests to redirect on CN requests page where user can view all CN claim requests from all over India. b. User can click on ZHO Requests to redirect on ZHO request page where user can view all ZHO claim requests from all over India. 6. User can view number of open or to be worked upon requests next to Approve Requests tab. 7. User can filter the CN and ZHO requests based on All, Claims Submission and Approved. 8. User can view all (pending and approved) credit note/ZHO requests, on the click of all tab. 9. User can view all pending claim approval credit note/ZHO requests, on the click of claims submission tab. 10. User can view all approved credit note/ZHO requests, on the click of approved tab. 11. User can filter the data by selecting time period (from/to date). 12. User can filter the data by selecting one of the divisions from Division drop down 13. User can filter the data by selecting one of the states from State drop down. 14. User can filter the date by selecting one of the Headquarters from HQ drop down. 15. User can also filter the requests by selecting one of the MR's all over India
--	--

	16. User can click on Go button, to apply the filters. 17. User can search the request by claim no. as well. Search will show the result up to 3 years old request via claim number search. 18. User can select/deselect all the claim requests, by clicking on Select All or Deselect All buttons. 19. User can select one by one single or multiple requests by clicking on check box(s) 20. User can also be able to scroll the view all the details. 21. User can also be able to view number of rows or items selected via select all or manual selection both options. 22. User can download the DR. prescription by clicking on DR. prescription file name. 23. User can view and download the supply bill(s) by clicking eye icon 24. User can be able to edit the Supply QTY and Supply Bonus Qty by clicking on edit button. 25. User can click on Save button to save the edited fields. 26. User can flag the item/row by clicking on flag icon. Row will be turned red, rest will remain as is white. 27. On the click on Flag icon, a pop-up will open and user can be able to add remarks notes on flagged row/item. 28. User can view requests via pagination. He/she would be allowed to click on page number to move and view the requests of next/that page. 29. By default, user can view 10 requests per page. User can also be able to change number of requests to view on per page. 30. User can enter remarks in text box while approving and rejecting the request(s). In case of multiple selection, same remarks will be applied on all the selected approved/rejected requests. 31. User can approve selected request (single or multiple) by clicking on Approve button. At this point, Forward integration would be required with SAP, all details of approved claims will be sent to SAP. Once approved – each claim will get a unique Credit Note or ZHO generated through SAP, and CN/ZHO number will be assigned to each claim. After receiving CN/ZHO number from SAP, backward Integration would be required, to send CN/ZHO Number against each approved claim from SAP to Superman. Once approved, each claim submission will be marked as completed and the Order History/Summary for all stakeholders (MR, FLM, SLM, TLM, Top line manager) will get updated. 32. User can reject selected request (single or multiple) by clicking on Reject button. 33. User would also be able to view managers remarks as well. 34. User can also click on Summary tab to get redirected on Summary page. 35. The use case ends.
Acceptance Criteria	1. User should be able to view CN and ZHO dashboard 2. User should be able to click on Approve Requests. 3. User should be able to click on Credit Note requests under approve requests. 4. User should be able to click on ZHO requests under approve requests 5. There should be clickable All, Claims Submission and Approved tabs to filter the CN or ZHO requests. On the click of each tab requests should be filtered.

	6. There should be time period from/to date selection through calendar icon. Icon should be clickable. User must be allowed to select dates from calendar. 7. There should be Division drop down. It should be clickable. User should be allowed to select single division from all divisions. 8. There should be State drop down. It should be clickable. User should be allowed to select single state from all states. 9. There should be HQ drop down. It should be clickable. User should be allowed to select single HQ from all HQ's. 10. There should be MR drop down. It should be clickable. User will be allowed to select single MR from all over India. 11. Search - User will be able to search the claims based on Claim number. 11.1. User will be able to click search bar. 11.2. User will be able to input in the search bar. 11.3. Search will be applied automatically and search results will be displayed after inputting 3 numbers. 11.4. On inputting any number in search bar, a cross icon should be displayed to user in search bar. 11.5. User should be able to click on the cross icon visible in search bar after typing characters/numbers in search bar. 11.6. On click cross icon, search input will be reset and data in list will be displayed accordingly. 12. There should be a Go button and it should be clickable. On the click of Go button, filters should be applied and data should be updated or shown on the basis respective filters. 13. There should be a select all and deselect all buttons. Those buttons should be clickable. On click of Select All button, all rows/items should be selected. On click of Deselect All button, all rows/items should be deselected. 14. On the basis of row/item selections, item selected should show selected rows/items numbers and should be updated dynamically on the basis selections and deselections. 15. Check box icons should be shown on each row. It should be clickable. On the click, check box should select/deselect. 16. There should be an Edit icon. It should be clickable. On the click of edit button, a pop-up will open and user should be allowed to edit Supply Qty and Supply bonus Qty. 17. There should be a Save button. it should be clickable. On the click of save button, edited values should be updated. 18. There should be a scroll bar. It should be clickable. Scroll bar should allow user to move right to left and vice versa to view all the data. 19. There should be pagination to show to show all the requests. On each page 10 requests would be shown by default. User would also be allowed to change number of requests to view on per page. 20. There should be a Flag icon on each row. It should be clickable. On the click of Flag icon, row will be turned red and rest of the rows will remain as is white. 21. User should be able to view Doctor's prescription file name. it should be clickable. If user clicks on file name, it should be downloaded. 22. User should be able to view supply bill(s) file names under attachment. Eye
--	---

	icon should be clickable. If user clicks on eye icon, it should show all the supply bills which can be viewable and downloaded too by clicking on download icon. 23. To show following fields, need to apply some logics: 23.1Difference Qty – will show difference quantity, Difference quantity = Supply offer – (minus) Purchase offer 23.2Monthly Consumption – will show total Quantity of product supplied till date in a month from claims approved requests. Refer supply QTY. 23.3Bonus Amount – will show bonus amount, bonus amount = Difference Quantity*(multiply) Price to Stockist 24. There should a text box for user to enter remarks. It should be clickable. In case of multiple selections, same remarks would be applied to all the approved/rejected requests. Remarks would be mandatory for rejection. 25. There should be an approve button. It should be clickable. On the click of Approve button, selected row(s)/request(s) should be marked approved. 26. There should be a Reject button. It should be clickable. On the click of Reject button, selected row(s)/request(s) should be marked rejected. 27. User should be able to click on Summary tab.
Frequency	Every time, when user wants view all/open CN and ZHO requests for CN team approval and take respective actions.

9.9.2 SUMMARY

Description: - This screen will help user to view summary of CN and ZHO requests on which Credit note or ZHO number has been generated by SAP. User will also be able view data by filters of time period (from/to date selection) and drop-down selections of MR & Stockist. User will have an option to view CN and ZHO requests segregated on the basis of total orders, sales values and Average extra discount which can be further segregated by Doctor, Stockist and product wise.

Prototype:

Data Elements:

S. No	Field Name	Field Type	Description
1	Summary	Tab	On click, can view or re-direct to summary page
2	From date	Calendar icon	Clickable, will open a calendar for user to select single date.

			User can select previous dates.
3	To date	Calendar icon	Clickable, will open a calendar for user to select single date. User can select previous dates but shouldn't be prior to 'from date'
4	HQ	Dropdown	Clickable, Shows all the Headquarter of India, allows to select single or multiple HQ from drop down
5	Stockist	Dropdown	Clickable, shows Stockist and allows to select single or multiple value
6	Go	Button	To apply the filters and update the summary details
7. Total Order tile			
7.1	Total Order number	Read only	Autofill, shows total no. of orders of CN and ZHO
7.2	Total Sales Value (in RS)	Read only	Autofill, shows total sales value of Pool in RS
7.3	Sales Value (in RS)	Read only	Autofill, shows total value of CN/ZHO orders in RS (invoice value after discount)
7.4	GST (in Rs)	Read only	Autofill, shows value GST based on total order in RS
7.5	Average Extra Discount	Read only	Autofill, shows average %age of discount requested via CN and ZHO requests
8. Credit Note Orders			

8.1	Credit Note Order number	Read only	Autofill, shows total no. of CN orders only
8.2	% Contribution of CN to Total sales	Read only	Autofill, shows contribution of CN in %age to total sales
